A Language of Contemporary Architecture Rafael Luna,Dongwoo Yim,2023-05-05 As a way to understand the contemporary project in architecture this book provides an index of ideas theories projects and definitions that string into a methodology for evaluating the contemporary language of architecture described as contemporism through a review of topology form and typology system and elements The contemporary project has been trying to answer the postmodern question of how to move beyond modernism through a thread of architectural styles that tried to respond to deficiencies from the modern promise and contextual changes Yet the question remains should this ongoing struggle to move beyond modernism be a stylistic battle Has the present architectural practice ever left the modernist tendencies and is there a structure for a contemporary language in architecture This book presents a collection of highly illustrated projects that have worked under these parameters to break away from modernism in order to present a holistic integration of topology and typology as a language for contemporism The index is illustrated with individual spreads which can be read sequentially or independently and encourages the reader to make their own connections It also includes interviews and contributions from Toyo Ito Anthony Vidler Ben van Berkel Christian Kerez and Greg Lynn This book is essential reading for undergraduate and graduate students in architecture

Architect Knows Best Simon Richards,2016-04-15 The idea that buildings could be used to reform human behaviour and improve society was fundamental to the modernist architecture and planning of people like Walter Gropius Le Corbusier and Jos Luis Sert in the first half of the 20th century Their proposals for functional zoning multi level transport high rise living and machine inspired aesthetics came under attack from the 1950s onwards and many alternative approaches to architecture and planning emerged It was thought that the environmental determinist strand of the discourse was killed off at this time as well This book argues that it was not but on the contrary that it has deepened and diversified Many of the most prominent architect planners continue to design with a view to improving the behaviour of individual people and of society at large By looking at and interviewing major figures and movements of recent years in Britain Europe and America including L on Krier Peter Eisenman Andr s Duany Jane Jacobs Robert Venturi and Denise Scott Brown it demonstrates the myriad ways that architect planners seek to shape human behaviour through buildings In doing so the book raises awareness of this strand within the discourse and examines its different purposes and manifestations It questions whether it is an ineradicable and beneficial part of architecture and planning or a regrettable throwback to a more authoritarian phase discusses why is it seldom acknowledged directly and whether it could be handled more responsibly and with greater understanding Richards does not provide any simple solutions but in conclusion is critical of architect planners

who abuse the rhetoric of social reform simply to leverage their attempts to secure building commissions while being more sympathetic towards those who appear to have a sincere desire to improve society through their buildings *Critical Forms*

Ross Wilson, 2023 *Critical Forms* is an account of the generic forms in which literary criticism has been undertaken. It examines literary criticism from around 1750 to the present and examines prefaces, selections and anthologies, reviews, lectures, dialogues, letters and life writing.
