Women Take Care Katie Hogan, 2018-08-06 Self sacrificing mothers and forgiving wives caretaking lesbians and vigilant maternal surrogates these good women are all familiar figures in the visual and print culture relating to AIDS In a probing critique of that culture Katie Hogan demonstrates ways in which literary and popular works use the classic image of the nurturing female to render queer AIDS more acceptable while consigning women to conventional roles and reinforcing the idea that everyone with this disease is somehow suspect In times of crisis the figure of the idealized woman who is modest and selfless has repeatedly surfaced in Western culture as a balm and a source of comfort and as a means of mediating controversial issues Drawing on examples from journalism medical discourse fiction drama film television and documentaries Hogan describes how texts on AIDS reproduce this historically entrenched paradigm of sacrifice and care a paradigm that reinforces biases about race and sexuality Hogan believes that the growing nostalgia for women s traditional roles has deflected attention away from women s own health needs Throughout her book she depicts caretaking as a fundamental human obligation but one that currently falls primarily to those members of society with the least power Only by rejecting the stereotype of the good woman she says can Americans begin to view caretaking as the responsibility of the entire society

a vivid and poignant portrayal of the experiences of HIV positive women in India during pregnancy birth and motherhood at the beginning of the 21st century The government of India together with global health organizations established an important public health initiative to prevent HIV transmission from mother to child While this program which targets poor women attending public maternity hospitals has improved health outcomes for infants it has resulted in sometimes devastatingly negative consequences for poor young mothers because these women are being tested for HIV in far greater numbers than their male spouses and are often blamed for bringing this highly stigmatized disease into the family Based on research conducted by the author in India this book chronicles the experiences of women from the point of their decisions about whether to accept HIV testing through their decisions about whether or not to continue with the birth if they test HIV positive their birthing experiences in hospitals decisions and practices surrounding breast feeding vs bottle feeding and their hopes and fears for the future of their children
