Air Power And The Ground War In Vietnam Ideas And Actions:

Air Power and the Ground War in Vietnam Donald J. Mrozek, 2002 Dr Donald J Mrozek's research sheds considerable light on how the use of air power evolved in the Vietnam War. Much more than simply retelling events, Mrozek analyzes how history, politics, technology, and the complexity of the war drove the application of air power in a long and divisive struggle. Mrozek delves into a wealth of original documentation, and his scholarship is impeccable. His analysis is thorough and balanced. His conclusions are well reasoned but will trouble those who have never seriously considered how the application of air power is influenced by factors far beyond the battlefield. Whether or not the reader agrees with Mrozek, the quality of his research and analysis makes his conclusions impossible to ignore. John C Fryer Jr, Brigadier General, United States Air Force, Commander, Center for Aerospace Doctrine Research and Education.

Air Power and the Ground War in Vietnam Donald J. Mrozek, 1988 Dr Mrozek focuses on expectations concerning the impact of airpower on the ground war. He describes some of the actual effects but avoids treatment of some of the most dramatic air actions of the war, such as the bombing of Hanoi. He observes that the application of airpower is influenced by factors far beyond the battlefield.

Air Power And The Ground War In Vietnam, Ideas And Actions Dr Donald J. Mrozek, 2015-11-06 Ultimately, this study is about a smaller Vietnam War than that which is commonly recalled. It focuses on expectations concerning the impact of air power on the ground war and on some of its actual effects but it avoids major treatment of some of the most dramatic air actions of the war, such as the bombing of Hanoi. To many who fought the war and believe it ought to have been conducted on a still larger scale or with fewer restraints, this study may seem almost perverse, emphasizing as it does the utility of air power in conducting the conflict as a ground war and without total exploitation of our most awe-inspiring technology. Although the chapters in this study are intended to form a coherent and unified argument, each also offers discrete messages. The chapters are not meant to be definitive. They do not exhaust available documentary material, and they often rely heavily on published accounts. Nor do they provide a complete chronological picture of the uses of air power, even with respect to the ground war. Nor is coverage of areas in which air power was employed—South Vietnam, Laos, Cambodia, and North Vietnam—evenly distributed, nor necessarily proportionate to the effort expended in each place during the war. Lastly, some may find one or another form of air power either slightly or insufficiently treated. Such criticisms are beside the point for the objectives of this study are to explore a comparatively neglected theme, the impact of air power on the ground, and to encourage further utilization of lessons drawn from the Vietnam experience.
