Agentmediated Electronic Commerce II Towards Nextgeneration Agentbased Electronic Commerce Systems:

Agent Mediated Electronic Commerce II Alexandros Moukas, Carles Sierra, Fredrik Ygge, 2007-01-01 The Internet is spawning many new markets and electronic commerce is changing many market conventions Not only are old commercial practices being adapted to the new conditions of immediacy brought forth by the global networks but new products and services as well as new practices are beginning to appear There is already ample evidence that agent based technologies will be crucial for these developments However many theoretical technological sociological and legal aspects will need to be addressed before such opportunities become a significant reality In addition to streamlining traditional transactions agents enable new types of transactions For example the elusive one to one marketing becomes more of a reality when consumer agents capture and share or sell consumer demographics Prices and other transaction dimensions need no longer to be fixed selling agents can dynamically tailor merchant offerings to each consumer Economies of scale become feasible in new markets when agents negotiate on special arbitration contracts Dynamic business relationships will give rise to more competitively agile organizations It is these new opportunities combined with substantial reduction in transaction costs that will revolutionize electronic commerce

Agent-Mediated Electronic Commerce IV. Designing Mechanisms and Systems Julian Padget, Onn Shehory, David Parkes, Norman Sadeh, William E. Walsh, 2003-08-03 This book constitutes the thoroughly refereed post proceedings of the 4th International Workshop on Agent Mediated Electronic Commerce AMEC 2002 held in Bologna Italy in July 2002 during the AAMAS 2002 conference The 20 revised full papers presented together with an introductory survey by the volume editors were carefully selected and improved during two rounds of reviewing and revision The book gives a unique overview of the state of the art of designing mechanisms and systems for agent mediated e commerce The papers are organized in topical sections on electronic auctions negotiations and electronic markets

Agent-Mediated Electronic Commerce VI Peyman Faratin, Juan A. Rodríguez-Aguilar, 2006-02-14 This book constitutes the thoroughly refereed post proceedings of the 6th International Workshop on Agent Mediated Electronic Commerce AMEC 2006 held in New York NY USA in July 2004 as part of AAMAS 2004 The 15 revised full papers presented were carefully selected from 39 submissions during two rounds of reviewing and revision The papers bring together novel work from such diverse fields as Computer Science Operations Research Artificial Intelligence and Distributed Systems that focus on modeling implementation and evaluation of computational trading institution and or agent strategies over a diverse set of goods They are organized in topical sections on mechanism design trading agents and tools

Agent Mediated Electronic Commerce II Alexandros Moukas, Carles Sierra, Fredrik Ygge, 2000-07-26 The Internet is spawning many new markets and electronic commerce is changing many market conventions Not only are old commercial practices being adapted to the new conditions of immediacy brought forth by the global networks but new products and services as well as new practices are beginning to appear There is already ample evidence that agent based technologies will be crucial for these developments

However many theoretical technological sociological and legal aspects will need to be addressed before such opportunities become a significant reality In addition to streamlining traditional transactions agents enable new types of transactions For example the elusive one to one marketing becomes more of a reality when consumer agents capture and share or sell consumer demographics Prices and other transaction dimensions need no longer to be fixed selling agents can dynamically tailor merchant offerings to each consumer Economies of scale become feasible in new markets when agents negotiate on special arbitration contracts Dynamic business relationships will give rise to more competitively agile organizations It is these new opportunities combined with substantial reduction in transaction costs that will revolutionize electronic commerce

Agent Mediated Electronic Commerce II Alexandros Moukas, Carles Sierra, Fredrik Ygge, 2014-03-12 The Internet is spawning many new markets and electronic commerce is changing many market conventions Not only are old commercial practices being adapted to the new conditions of immediacy brought forth by the global networks but new products and services as well as new practices are beginning to appear There is already ample evidence that agent based technologies will be crucial for these developments However many theoretical technological sociological and legal aspects will need to be addressed before such opportunities become a significant reality In addition to streamlining traditional transactions agents enable new types of transactions For example the elusive one to one marketing becomes more of a reality when consumer agents capture and share or sell consumer demographics Prices and other transaction dimensions need no longer to be fixed selling agents can dynamically tailor merchant offerings to each consumer Economies of scale become feasible in new markets when agents negotiate on special arbitration contracts Dynamic business relationships will give rise to more competitively agile organizations It is these new opportunities combined with substantial reduction in transaction costs that will revolutionize electronic commerce

Declarative Agent Languages and Technologies Joao Leite, 2004-06-02 The growing complexity of agent systems calls for models and technologies that allow for system predictability and enable feature discovery and verification Formal methods and declarative technologies have recently attracted a growing interest as a means for dealing with such issues This book presents revised and extended versions of 11 papers selected for presentation at the First International Workshop on Declarative Agent Languages and Technologies DALT 2003 held in Melbourne Australia in July 2003 during AAMAS also included are 3 invited papers by leading researchers in the area to ensure competent coverage of all relevant topics The papers are organized in topical sections on software engineering and MAS prototyping agent reasoning BDI logics and extensions social aspects of multi agent systems

Agent Mediated Electronic Commerce, 2002 Vol for 1998 consists of selected papers from proceedings of the International Workshop on Agent Mediated Electronic Trading

Financial Cryptography Ari Juels, 2004-09-21 The 8th Annual Financial Cryptography Conference was held during 9-12 February 2004 in Key West Florida USA The conference was organized by the international Financial Cryptography Association IFCA The program committee which comprised 25 members reviewed 78 submissions of which only 17 were

accepted for presentation at the conference This year s conference differed somewhat from those of previous years in its consideration of papers devoted to implementation rather than purely conceptual research one of these submissions was presented at the conference This represented a movement in the conference toward practical problems and real world perspectives as a complement to more traditional academic forms of research In this spirit the program included a number of excellent invited speakers In the opening talk of the conference Jack Selby threw down the gauntlet scribing some of the achievements of the PayPal system but also enumerating reasons for the failures of many elegant e cash schemes in the past Ron Rivest in contrast described an emerging success in the cleverly conceived Peppercoin micropayment system Jacques Stern enlightened us with his experience in the cryptographic design of banking cards in France Simon Pugh unveiled some tails of anew generation of wireless credit card Finally in deference to the many consumers in the world lacking either techno savvy or technological resources that we often too easily take for granted Jon Peha described a elded banking system that avoids reliance on conventional financial infrastructures Thanks to all of these speakers for rounding out the conference with their expertise and breadth of vision An Agent-Based Approach for Coordinated Multi-Provider Service Provisioning

Monique Calisti,2012-12-06 This book proposes a novel approach to improve multi provider interactions based on the coordination of autonomous and self motivated software entities acting on behalf of distinct operators In addition a novel way of addressing resource allocation and pricing in a compact framework is made possible by the use of powerful resource abstraction techniques The book is addressed to researchers in the area of agent technology automated negotiation distributed constraint satisfaction and networking Furthermore it should be a valuable resource for both network and service providers High Performance Computing and Grids in Action Lucio Grandinetti,2008 Collects in four chapters single monographs related to the fundamental advances in parallel computer systems and their developments from different points of view from computer scientists computer manufacturers end users and related to the establishment and evolution of grids fundamentals implementation and deployment
