Agricide The Hidden Farm And Food Crisis That Affects Us All:

The Meat Business Geoff Tansey, Joyce D'Silva, 2019-07-19 Originally published in 1999 The theme running through this collection of essays is that food quality and human health the welfare of animals and the methods of farming and the quality of the environment go hand in hand This theme continues along the lines that the present system is harmful to them all and to our ability to generate enough good food for the whole world The contributors to the volume offer alternatives for more humane and moderate methods of farming which produce enough nourishing food without damaging the environment it depends on

Agricide Michael W. Fox, 1996-01-01 The industrialization of American agriculture has recently emerged as a threat to this nation's future It is responsible for widespread soil erosion the depletion of deep water aquifers the deterioration of soil quality and the pollution of our air water and food Under the protection of GATT and the World Trade Organization industrialized agriculture boosted by the capitalistic hopes of genetic engineering biotechnology is spreading worldwide The global reach of agribusiness contributes to rural poverty and hunger as traditional farming practices are supplanted The only beneficiary is agribusiness itself the petrochemical industry which manufactures pesticides and fertilizers and which now monopolizes much of the world's agriculture seed stock equipment manufacturers the grain livestock feed and pet food industries the pharmaceutical industry and the wholesale food industry If the structure and practice of agriculture is not quickly changed and made ecologically more sound health inducing humane and equitable the next generation will face inevitable agricide This book is a call to conscience to consumers and farmers alike and it is a challenge to agribusiness government and agricultural scientists to be accountable and responsible

A Communion of Subjects Paul Waldau, Kimberley Patton, 2009-05-22 A Communion of Subjects is the first comparative and interdisciplinary study of the conceptualization of animals in world religions Scholars from a wide range of disciplines including Thomas Berry cultural history Wendy Doniger study of myth Elizabeth Lawrence veterinary medicine ritual studies Marc Bekoff cognitive ethology Marc Hauser behavioral science Steven Wise animals and law Peter Singer animals and ethics and Jane Goodall primatology consider how major religious traditions have incorporated animals into their belief systems myths rituals and art Their findings offer profound insights into the relationship between human beings and animals and a deeper understanding of the social and ecological web in which we all live

Bioethics and Social Ethics in The Modern World Ivan Pavić, Nikša Alfrević, Suzana Vuletić, 2025-05-16 This book explores the philosophical analysis of attitudes and values and sustainable behaviors in fields such as healthcare social sciences economics in the context of environmental studies It firstly investigates the fundamental concept of bioethics with relevant case studies related to the issues of human life and preservation of dignity The authors then move on to discuss the application of bio ethical principles in contemporary society and within the market economy The last part of the book brings together a variety of perspectives on the general philosophical and ethical foundations of sustainable behavior based on the idea of human dignity This book offers a guide to

understanding responsible sustainability practices in various fields while considering the social benefits and economic effectiveness of sustainable behaviors

Animal Welfare Science, Husbandry and Ethics: The Evolving Story of Our Relationship with Farm Animals Mark Fisher, 2018-12-14 Animal Welfare has been a subject of intellectual and academic study for a long time In the past philosophers thought leaders and scientists have contributed to the debate and seismic changes such as the advent of post war industrial farming have brought about changes in attitudes to the way animals are farmed Animal welfare as a science and philosophy can be understood as a trajectory through history of our understanding of our relationship with animals enhanced in recent years through studies into animal behaviour and cognition and societal changes in the way we view animals Animal Welfare Science Husbandry and Ethics charts the history of our understanding of farm animal welfare throughout time the human use of animals in different eras and farming in different systems seeing the emergence of intensification and science and technology The book examines the human non human animal relationship with a philosophical approach examining the connections and disconnections between animals and people and charts the beliefs and motives of different philosophers theories and movements in animal welfare from early history to the present The book also looks at our current animal welfare systems examining what is working and what is not the pathway to how we got here and looks at future considerations for animal welfare putting forward the author s thoughts on achieving a sustainable animal welfare model Intended for animal welfare students teachers researchers and academic libraries Animal Welfare Science Husbandry and Ethics introduces a complex subject requiring an understanding of the underlying factors and drivers of human behaviour and farming systems Only by acknowledging the complexity and understanding the factors contributing to that complexity can we hope to develop an equitable and sustainable animal welfare for the future 5m Books

Geographies of Agriculture Guy Robinson, 2014-01-14 Agricultural Geography has changed dramatically in recent decades reflecting the transformation of the farming industry itself Geographies of Agriculture embraces these changes applying ideas and methods from contemporary social science as it moves beyond farm based production to address current issues affecting the production and consumption of food and fibre throughout the world The book places special emphasis on topics that reflect globalisation processes integration of agriculture into the wider agri food system concern with attaining sustainable production systems and the importance of both government and supra government policies Examples are drawn from North America Western Europe and the developing world Geographies of Agriculture will appeal especially to Geography students but should also be of interest to a broader range of students in Sociology Economics and Development Studies and anyone interested in agriculture food production and consumption and rural development
