Lees' Loss Prevention in the Process Industries Frank Lees, 2012-11-05 Safety in the process industries is critical for those who work with chemicals and hazardous substances or processes. The field of loss prevention is and continues to be of supreme importance to countless companies, municipalities, and governments around the world, and Lees is a detailed reference to defending against hazards. Recognized as the standard work for chemical and process engineering safety professionals, it provides the most complete collection of information on the theory, practice, design elements, equipment, regulations, and laws covering the field of process safety. An entire library of alternative books and cross referencing systems would be needed to replace or improve upon it, but everything of importance to safety professionals, engineers, and managers can be found in this all-encompassing three-volume reference. Instead, the process safety encyclopedia, trusted worldwide for over 30 years, is now available in print and online to aid searchability and portability. Over 3,600 print pages cover the full scope of process safety and loss prevention, compiling theory, practice, standards, legislation, case studies, and lessons learned in one resource as opposed to multiple sources.
