

A Short Biography of Mozart

Mozart lived a short life--he was born on January 27, 1756, and died of illness on December 5, 1791. He was only thirty-five years old at the time of his death. Born Johannes Chrysostomus Wolfgangus Theophilus to Leopold and Anna Maria Mozart, he was, along with his sister Maria Anna (Nannerl), among the two fortunate surviving children out of the seven Anna Maria bore.

Nannerl deserves special mention. Numerous historical sources describe her as a musician and composer of equal talent as her younger brother. However, the sad fact is that given the social context into which she was born, her musical abilities were not allowed to develop as rigorously as her brother's. Still, we have evidence of her extraordinary talent through descriptions and records that were kept by the courts at which she performed, as well as personal letters. From her correspondence with her brother before his marriage to Constanze Weber, scholars have also pointed out her remarkable intelligence. Who knows what she might have produced had she been allowed to become a fully fledged composer.
