Artful Universe:

The Artful Universe Expanded John Barrow, 2011-03-10 In *The Artful Universe* OUP 1995 John D Barrow explored the close ties between our aesthetic appreciation and the basic nature of the Universe challenging the commonly held view that our sense of beauty is entirely free and unfettered It looked at some of the unexpected ways in which the structure of the Universe its laws its environments and above all its underlying mathematical structure imprints itself on our thoughts our aesthetic preferences and our views about the nature of things The exploration embraced topics such as perspective the size of things and the origins of aesthetics computer art posing the question is it art and the origins of our susceptibility to music Life sales of the hardback totalled just over 25 000 copies The study of the evolutionary and mathematical underpinnings of our aesthetic sense and our understanding of the nature and scale of the universe has grown over the past decade with developments in evolutionary psychology and in cosmology This paperback of the revised edition OUP 2005 contains eight new sections covering the recent discoveries of extrasolar planets fashionable postmodernist rejection of science as uncovering objective reality growing understanding of key ratios appearing in biological relationships and studies of the underlying mathematical structure of a Pollock painting *The Artful Universe* John D. Barrow, 1995 An eclectic survey of the links between the creative arts and the sciences **The Artful Universe** John D. Barrow, 1995 [The Artful Species](#) Stephen Davies, 2012-11-29 *The Artful Species* explores the idea that our aesthetic responses and art behaviors are connected to our evolved human nature Our humanoid forerunners displayed aesthetic sensibilities hundreds of thousands of years ago and the art standing of prehistoric cave paintings is virtually uncontested In Part One Stephen Davies analyses the key concepts of the aesthetic art and evolution and explores how they might be related He considers a range of issues including whether animals have aesthetic tastes and whether art is not only universal but cross culturally comprehensible Part Two examines the many aesthetic interests humans take in animals and how these reflect our biological interests and the idea that our environmental and landscape preferences are rooted in the experiences of our distant ancestors In considering the controversial subject of human beauty evolutionary psychologists have traditionally focused on female physical attractiveness in the context of mate selection but Davies presents a broader view which decouples human beauty from mate choice and explains why it goes more with social performance and self presentation Part Three asks if the arts together or singly are biological adaptations incidental byproducts of nonart adaptations or so removed from biology that they rate as purely cultural technologies Davies does not conclusively support any one of the many positions considered here but argues that there are grounds nevertheless for seeing art as part of human nature Art serves as a powerful and complex signal of human fitness and so cannot be incidental to biology Indeed aesthetic responses and art behaviors are the touchstones of our humanity **Scimat Anthology: Histophysics, Art, Philosophy, Science** Lui Lam, 2024-08-16 *Scimat* science of human is a new multidiscipline proposed by Lui Lam in 2007 *Scimat* treats all studies on human as a unified

enterprise In terms of content Scimat Humanities Social Science Medical Science Scimat advocates the use of humanities science synthesis in understanding humans and collaboration between the humanists and natural scientists The ultimate aim of Scimat is to better humanity by bettering the humanities It has done so in the study of history art philosophy and science giving rise to some interesting and important results such as the appearance of a new discipline called Histophysics physics of history a new interpretation of art s origin and nature a better understanding of the differences between the philosophies of the West and East and a rigorous definition of science Scimat Anthology collects 27 original articles in the humanities published or unpublished from 2000 to 2024 with 26 by the founder of Scimat ending with an in depth analysis of Stephen Hawking and his legacy Readership ranges from high school students and laypeople to professors of all disciplines who are interested in what the humanities and science are about as well as new ideas in bridging them **Art and Complexity** J. Casti,A. Karlqvist,2003-02-19 This title is the result of a one week workshop sponsored by the Swedish research agency FRN on the interface between complexity and art Among others it includes discussions on whether good art is complex art how artists see the term complex and what poets try to convey in word about complex behavior in nature *How Large Is God* John Marks Templeton,2022-08-22 This new collection of essays reveals how very little we know about God and fundamental spiritual principles In recent years scientific research has revealed that the universe is staggering in size and intricacy and some scientists are now suggesting that our definition of God is much too small Nine distinguished scholars and scientists present their varied views on the dimensions of God Edited by philanthropist John Marks Templeton this fascinating and challenging book continues the exploration of theological and philosophical implications of the momentous and accelerating scientific discoveries of our times **Systemic Semiotics** Piotr Sadowski,2022-09-08 Against the background of often esoteric literature in semiotics this book offers a fresh and rigorous new interpretation of how to approach the study of communication signs and meaning Grounded in a deductive theory of interacting systems Piotr Sadowski s book provides an accessible account of the hierarchy of communication Divided into two parts this book argues in the first section that a deductive semiotic theory generates communication situations of increasing complexity from contiguous communication to indirect referential forms based on indexical iconic and symbolic signs Within this system Sadowski explains how key concepts of the semiotic model such as information parainformation and metainformation can account for degrees of cognitive complexity of communication processes including the perception and interpretation of signs on literal and figurative levels After this clear step by step exposition of the theory of interacting systems Systemic Semiotics then explores various applications of this theory providing new insights into problems subsumed under communication studies cultural theory literary and film studies and psychology **God in the Dark** Peter Longson,2012-07-12 What becomes of faith in God when bad stuff happens How do we react when we realise that for all its glories this world can be a dark dangerous and disappointing place Peter Longson s honest unflinching exploration of the nature of evil and its consequences for life and

faith leads him to some surprising and liberating conclusions about the nature of God **Cohabiting Earth** Joe Gray, Eileen Crist, 2024-11-01 The eco catastrophes that we are witnessing today starkly demonstrate how the interests of the Earth's currently dominant species are in lockstep with those of nature's wider whole Simply stated humans and the more than human world have a shared fate Just as humanity's unrestrained overreach in the ecosphere is driving a mass extinction event and causing the devastation of lifeforms and places so it is also jeopardizing the prospect of a human future worth living There is no humans versus nature tradeoff the wellbeing of both is inseparably entwined Solutions to the shared predicament of all Earth's beings will thus necessarily be those that strive for harmony between human presence and the rest of nature This applies to the philosophy we adopt for agriculture the ways in which human economies operate our patterns of consumption and numerous other intertwined threads of our existence This anthology argues that harmony between humanity and our home planet must be built on the pillars of restraint respect and reverence
