

3-D HOME KIT

All You Need to Construct a Model of Your Own Home or Addition

A three-dimensional model helps you visualize ideas and communicate them to others. The removable roof and furniture symbols aid in floor plan and interior design.

Whether you are designing your own model, addition or remodeling project or working with a professional, there is no substitute for seeing your plans in three dimensions before you build. They will make for accurate estimates. In each case, cardboard model building materials to construct a three-dimensional model of your own home—up to 8,000 square feet. With the kit, you can explore the design of your property, see the final reality before undertaking pricing, plans, budget and design, and even use for design ideas.

Model building items include: furniture of dining, living, bedrooms, stairs, wrought iron, lawn, stone, stone walls, doors, bay windows, and large windows, built-in features, landscaping, and more. Each piece is a ring and a cap. You can make a model of almost any home design with the kit and the kit also includes a Floor Plan Grid and Furniture Symbols to help you represent floor plans, landscaping and interior design.

New Home

Architects often use a three-dimensional model to work out a design and show how the finished project will look. Using the 3-D model kit, you can do the same. Your model will let you see with your own eyes all the important parts before a construction is started. Sometimes a single impression from an architectural model can produce a design solution in the right place or making a room a few feet larger can make a crucial difference in the final project.

The kit is also ideal for constructing an existing set of blueprints.

Remodeling & Additions

The 3-D Home Kit is especially useful for planning an addition or remodeling project. A physical model of your existing house shows the floor design and your model to which doors, walls, change the roof design to add a new deck, new entry, windows or daylight.

For example, you can plan a new design for adding a room to the end of the house. Now move a light or a table between the path of the sun and you can visualize where the sun will shine on your house during each season. By working with a model, you can explore many different designs for your home—from major additions to new living materials and patterns.

The Floor Plan Grid and model building materials contained provide the two most important tools you need to plan any home building project.

Why? You compare the models of both designs, see what one is better for you—before you build.

The kit includes enough cardboard building material to construct one house or up to 8,000 square feet of several smaller houses. Fun and easy to use.
