Sanitation, Latrines and Intestinal Parasites in Past Populations Piers D. Mitchell, 2016-03-03 Sanitation and intestinal health is something we often take for granted today. However, people living in many regions of the developing world still suffer with debilitating diseases due to the lack of sanitation. Despite its clear impact upon health in modern times, sanitation in past populations is a topic that has received surprisingly little attention. This book brings together key experts from around the world to explore fascinating aspects of life in the past relevant to sanitation and how that affected our ancestors. By its end, readers will realize that toilets were in use in ancient Mesopotamia even before the invention of writing and that flushing toilets with anatomic seats were a technology of ancient Greece at the time of the Minotaur myth. They will see how sanitation compared in ancient Rome and medieval London and will take a virtual walk around the sanitation of York at the time of the Vikings. Readers will also understand which intestinal parasites infected humans in different regions of the world over different time periods, what these parasites tell us about early human evolution, later population migrations, past diet, lifestyle, and the effects of sanitation technology. There is good evidence that over the millennia, people in the past realized that sanitation mattered. They invented toilets, cleaner water supplies, drains, waste disposal, and sanitation legislation. While past views on sanitation were very different to those of today, it is clear that many past societies took sanitation much more seriously than was previously thought. [Ancient Mesopotamia](#) Susan Pollock, 1999-05-20 Innovative study of the early state and urban societies in Mesopotamia c. 5000 to 2100 BC. **City of Culture 2600 BC: Early Mesopotamian History and Archaeology at Abu Salabikh** John Nicholas Postgate, 2024-03-07 This book presents the city beneath the surface of Abu Salabikh, southern Iraq. The archaeology and the textual data combine to reveal its architecture, agricultural and industrial enterprises, and social structure. Integrated with our wider knowledge of south Mesopotamia at this time, it creates a vivid image of city life in 2600 BC. [Death Rituals, Ideology, and the Development of Early Mesopotamian Kingship](#) Andrew C. Cohen, 2005-10-01 At the beginning of Mesopotamia's Early Dynastic period, the political landscape was dominated by temple administrators, but by the end of the period, rulers whose titles we translate as king assumed control. This book argues that the ritual process of mourning, burying, and venerating dead elites contributed to this change. Part one introduces the rationale for seeing rituals as a means of giving material form to ideology and hence structuring overall power relations. Part two presents archaeological and textual evidence for the death rituals. Part three interprets symbolic objects found in the Royal Cemetery of Ur, showing they reflect ideological doctrines promoting the office of kingship. This book will be particularly useful for scholars of Mesopotamian archaeology and history. **The Early Glyptic of Tell Brak** Donald M. Matthews, 1997 This book is the most comprehensive treatment of the art of Syria in the third millennium B.C. It is a catalogue of nearly 600 seals from Tell Brak, combined with a general study of the comparative material. It is both a basic word of reference and a new synthesis of the Syrian Early Bronze Age, relating to taxation during the New Kingdom. *Critical*
