The Decline Effect Dean Brooks, 2023-01-23 A crisis is coming for everyone who uses math and science. For decades now the classical model of probability, the indifference principle and the Gaussian distribution has been breaking down and revealing its limitations in fields from economics to epidemiology. Now a new approach has revealed the underlying non-classical principle behind all these anomalous laws: Pareto's law of elite incomes, Zipf's law of word frequencies, Lotka's law of scientific publications, Kleiber's law of metabolic rates, the Clausewitz-Dupuy law of combat friction, Moore's law of computing costs, the Wright-Henderson cost law, Weibull's law of electronics failures, the Flynn Effect in IQ scores, Benford's law of digit frequencies, Farr's law of epidemics, Hubbell's neutral theory of biodiversity, Rogers' law of innovation classes, Wilson's law of island biogeography, Smeed's law of traffic fatalities. The general law behind all these particular laws and countless others is the decline effect. As a system ages or grows in size, the rules of probability subtly change. Entropy increases, rare items become rarer, and average performance measures decline. The human meaning of a decline may be positive (decreasing costs, falling epidemic mortality) or negative (lower customer loyalty, decreasing efficiency), but the mathematical pattern is always the same. The implications are enormous, as these examples show. All epidemic diseases decline in infectiousness and in lethality. HIV/AIDS went from a highly infectious 95 percent fatal disease to a survivable condition with a latency of decades. COVID-19 went from a death rate of 7 percent in early 2020 to under 2 percent in 2022. Hereditary dynasties around the world declined smoothly in lifespan from hundreds of years to tens of years. When democracies replaced monarchies, the decline in spans of party control continued.

Just imagine you and your mates down the local pub, chatting about your favourite shade of pink. Difficult. It might be a laughing matter, but if you don't really care about your image, you might be having a harder time at work, not to mention on the romance front. Studies have proven that a poor image limits prospects at work and that others make major judgements based entirely on our appearance.
