experiences for your web applications **The Entrepreneurial Journalist's Toolkit** Sara Kelly, 2015-02-11 Today's journalism and communication students need the tools to develop and maintain their own media businesses and freelance careers. In addition to mastering the basics of converged journalism practice, they need training in business entrepreneurship, mass communication, and business law and career and reputation management. *The Entrepreneurial Journalist's Toolkit* provides a solid foundation of multimedia journalism and also teaches readers to create solid business plans and develop funding proposals while maintaining high legal and ethical standards. This book details the process of pitching and working with clients, managing multi-platform communication campaigns to maximize reach, keeping the books, and filing taxes. It provides everything a new or experienced journalist needs to get started as a media entrepreneur.

Middleware for Communications Qusay Mahmoud, 2005-06-10 A state-of-the-art guide to middleware technologies and their pivotal role in communications networks. Middleware is about integration and interoperability of applications and services running on heterogeneous computing and communications devices. The services it provides, including identification, authentication, authorization, soft switching, certification, and security, are used in a vast range of global appliances and systems, from smart cards and wireless devices to mobile services and e-Commerce. Qusay H. Mahmoud has created an invaluable reference tool that explores the origins and current uses of middleware, highlighting the importance of such technologies as CORBA, J2EE, and JMS, and has thus compiled the roadmap to future research in this area. *Middleware for Communications* discusses the emerging fields of Peer-to-Peer (P2P) and grid middleware, detailing middleware platforms such as JXTA and the Globus middleware toolkit. It shows how Middleware will play a significant role in mobile computing, presents a Platform Supporting Mobile Applications (PLASMA), a middleware platform that consists of components for location, event, and profile handling of Location-Based Services, introduces middleware security focusing on the appropriate aspects of CORBA, J2EE, and NET, and demonstrates how to realize complex security capabilities such as role-based access control (RBAC) and mandatory access control (MAC). It discusses how Quality of Service (QoS) component middleware can be combined with Model-Driven Architecture (MDA) technologies to rapidly develop, generate, assemble, and deploy flexible communications applications. This incomparable overview of middleware for communications is suitable for graduate students and researchers in communications and computing departments. It is also an authoritative guide for engineers and developers working on distributed systems, mobile computing, and networked appliances.
