Computers As Assistants Peter Hoschka,2021-01-31 Computer systems based on the notion of the computer as assistant have recently become the focus of intense interest The expanding role of the computer in everyday life and the growing number of untrained users make it necessary to think about new ways of dividing labor between humans and machines Future systems must take on more tasks and perform them more competently and autonomously than existing systems If they are to be adequately flexible and responsive to complexity they cannot automate their performance completely The aim of designers should be to create computer systems with capabilities similar to those of good assistants in the real world Effective assistance has many characteristics An assistant is expected to be competent in some domains of expertise to know the limits of his her knowledge to be able to process inexact instructions from clients to adjust to and learn from them to explain his her behavior and suggestions and to support clients in communication and cooperation with other people This book believes that such capabilities can be built into computer systems To that end the chapter contributors discuss the concepts and methods particularly from the fields of artificial intelligence and computer supported cooperative work CSCW that they have drawn from to develop successful system prototypes They present several of these prototypes including assistants for graphics design knowledge discovery in data bases coordination support organizational memory user interface design and knowledge base construction As such this volume helps map out the future for all those involved in computer systems design

A Handbook of Management Theories and Models for Office Environments and Services Rianne Appel-Meulenbroek,Vitalija Danivska,2021-08-02 Although workplace design and management are gaining more and more attention from modern organizations workplace research is still very fragmented and spread across multiple disciplines in academia There are several books on the market related to workplaces facility management FM and corporate real estate

management CREM disciplines but few open up a theoretical and practical discussion across multiple theories from different disciplines Therefore workplace researchers are not aware of all the angles from which workplace management and effects of workplace design on employees has been or could be studied A lot of knowledge is lost between disciplines and sadly many insights do not reach workplace managers in practice Therefore this new book series is started by associate professor Rianne Appel Meulenbroek Eindhoven University of Technology the Netherlands and postdoc researcher Vitalija Danivska Aalto University Finland as editors published by Routledge It is titled Transdisciplinary Workplace Research and Management because it bundles important research insights from different disciplinary fields and shows its relevance for both academic workplace research and workplace management in practice The books will address the complexity of the transdisciplinary angle necessary to solve ongoing workplace related issues in practice such as knowledge worker productivity office use and more strategic management In addition the editors work towards further collaboration and integration of the necessary disciplines for further development of the workplace field in research and in practice This book series is relevant for workplace experts both in academia and industry This second book in the series focuses on the role of workplace management in the organization and the tasks that workplace management needs to consider The 18 theories that are presented in this book and applied to workplace research discuss management aspects from the organization's perspective or dive deeper into issues related to people and/or building management They all emphasize that workplace management is a complex matter that requires more strategic attention in order to add value for various stakeholders The final chapter of the book describes a first step towards integrating the presented theories into an interdisciplinary framework for developing a grand workplace management theory Blended Learning Environments for Adults: Evaluations and Frameworks
