Advanced Telescope Making Techniques Volume 2:

The Observer's Guide to Astronomy: Volume 2 Patrick Martinez, 1994-09-22 How can you find new minor planets comets and novae How can you use photoelectric detectors to derive the temperatures of stars And how can you predict future eclipses and occultations of stars by minor planets The questions asked by serious amateur astronomers are answered in this authoritative and wide ranging guide first published in 1994 For each topic sound practical methods of observation and the scientific background are given to lead you to better observations Guidelines also show you how to record and catalogue your observations using the recognised professional terminology and classification schemes From the simplest pencil drawings of the moon to observations of the most distant galaxies with state of the art CCD cameras and photoelectric photometers this guide is packed with practical tips for all types of amateur observations It will develop the observational skills of the keen novice and satisfy the more demanding needs of the experienced amateur astronomer Advanced Telescope Making Techniques: Mechanical Allan Mackintosh, G. Kenneth Hawkings, Ferdinand I. Baar, 1986 **Amateur Telescope Making** Stephen Tonkin, 2012-12-06 Many amateur astronomers make their own instruments either because of financial considerations or because they are just interested Amateur Telescope Making offers a variety of designs for telescopes mounts and drives which are suitable for the home constructor The designs range from simple to advanced but all are within the range of a moderately well equipped home workshop The book not only tells the reader what he can construct but also what it is sensible to construct given what time is available commercially Thus each chapter begins with reasons for undertaking the project then looks at theoretical consideration before finishing with practical instructions and advice An indication is given as to the skills required for the various projects Appendices list reputable sources of mail order materials and components The telescopes and mounts range from shoestring very cheap instruments to specialist devices that are unavailable commercially Telescope Making , 1990 **Opto-Mechanical Systems Design, Volume 2** Paul Yoder, Daniel Vukobratovich, 2017-12-19 Opto Mechanical Systems Design Fourth Edition is different in many ways from its three earlier editions coauthor Daniel Vukobratovich has brought his broad expertise in materials opto mechanical design analysis of optical instruments large mirrors and structures to bear throughout the book Jan Nijenhuis has contributed a comprehensive new chapter on kinematics and applications of flexures and several other experts in special aspects of opto mechanics have contributed portions of other chapters An expanded feature a total of 110 worked out design examples has been added to several chapters to show how the theory equations and analytical methods can be applied by the reader Finally the extended text new illustrations new tables of data and new references have warranted publication of this work in the form of two separate but closely entwined volumes This second volume Design and Analysis of Large Mirrors and Structures concentrates on the design and mounting of significantly larger optics and their structures including a new and important topic detailed consideration of factors affecting large mirror performance The book details how to design and fabricate very

large single substrate segmented and lightweight mirrors describes mountings for large mirrors with their optical axes in vertical horizontal and variable orientations indicates how metal and composite mirrors differ from ones made of glass explains key design aspects of optical instrument structural design and takes a look at an emerging technology the evolution and applications of silicon and silicon carbide in mirrors and other types of components for optical applications

Astronomy ,1987 Scientific American The Amateur Astronomer Shawn Carlson,2008-05-02 From the longest running column in Scientific American s history comes this collection of fascinating projects for amateur astronomers For over seventy years The Amateur Scientist column in Scientific American has helped people explore their world and make original discoveries This collection of both classic and recent articles presents projects for amateur astronomers at all levels Hands on astronomy fans will find how to build inexpensive astronomical instruments using ordinary shop tools From making a telescope to predicting satellite orbits to detecting the chemical composition of faraway stars this book has something for everyone interested in practical astronomy Monthly Notes of the Astronomical Society of Southern Africa Astronomical Society of Southern Africa,1995 **Telescope Making Techniques** ,1977 Reflecting Telescope Optics I Raymond N. Wilson,2013-03-09 This is the first volume of a monumental work that will provide a complete treatment of all theoretical aspects of reflecting telescope optics It addresses all specialists in the field both within the astronomical community and in industry and consequently particular emphasis is placed on subjects such as practical alignment test techniques and maintenance aspects Whereas the second volume will concentrate on technical aspects and modern developments this one is devoted to the theory of reflecting telescope optics and together with the historical development it will also prove to be useful to students This book has real classic potential
