Advances in Computer and Information Sciences '98 U. Gudukbay,1998 This volume includes very high quality papers in different areas of computer and information sciences The main themes are computer network performance evaluation and artificial neural networks and their applications The latest developments in these areas are presented by a number of distinguished researchers from all over the world These proceedings of The 13th International Symposium on Computer and Information Sciences ISCIS 98 contain outstanding papers specifically related to the areas of Gelenbe neural networks and their applications performance of computer communication networks simulations and analytic methods in order to study the performance of telecommunication networks scheduling and resource allocation in computer and multimedia systems stochastic ordering applied to performance evaluation and simulation of virtual humans **Advances in Electrical and Computer Technologies** Thangaprakash Sengodan, Sanjay Misra, Murugappan M, 2025-07-04 This book comprises a selection of papers presented at the Sixth International Conference on Advances in Electrical and Computer Technologies ICAECT 2024 It compiles groundbreaking research and advancements in the field of electrical engineering electronics engineering computer engineering and communication technologies The book touches upon a wide array of topics including smart grids soft computing techniques in power systems smart energy management systems and power electronics under the Electrical Engineering track and biomedical engineering antennas and waveguides image and signal processing and broad band and mobile communication under the Electronics Engineering track With special emphasis on Computer Engineering this book highlights emerging trends in computer vision pattern recognition cloud computing pervasive computing intelligent systems artificial intelligence neural network and fuzzy logic machine learning deep learning data science video processing and wireless communication This is a valuable resource for students researchers and engineers within the field of innovative research and practical applications of electrical and computer technologies **Advances in Computer Communications** Wesley W. Chu, 1976 **Advances in Computer, Information, and Systems Sciences, and Engineering** Khaled Elleithy, Tarek Sobh, Ausif Mahmood, Magued Iskander, Mohammad A. Karim, 2007-06-06 The conference proceedings of International Conference on Industrial Electronics Technology not only the reviewing submissions and registration processes but also the actual conference Conference participants authors presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office Suffice to say that CISSE received submissions from more than 50 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference The CISSE

conference audio room provided superb audio even over low speed internet connections the ability to display PowerPoint presentations and cross platform compatibility the conferencing software runs on Windows Mac and any other operating system that supports Java In addition the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session The implemented conferencing technology starting with the submission review system and ending with the online conferencing capability allowed CISSE to conduct a very high quality fulfilling event for all participants See www.cissee2005.org sections IETA TENE EIAE

Advances in Cyber Security and Intelligent Analytics Abhishek Verma, Jitendra Kumar, Hari Mohan Gaur, Vrijendra Singh, Valentina Emilia Balas, 2022-12-21 We live in a digital world where we use digital tools and smart devices to communicate over the Internet In turn an enormous amount of data gets generated The traditional computing architectures are inefficient in storing and managing this massive amount of data Unfortunately the data cannot be ignored as it helps businesses to make better decisions solve problems understand performance improve processes and understand customers Therefore we need modern systems capable of handling and managing data efficiently In the past few decades many distributed computing paradigms have emerged and we have noticed a substantial growth in the applications based on such emerging paradigms Some well known emerging computing paradigms include cloud computing fog computing and edge computing which have leveraged the increase in the volume of data being generated every second However the distributed computing paradigms face critical challenges including network management and cyber security We have witnessed the development of various networking models IoT SDN and ICN to support modern systems requirements However they are undergoing rapid changes and need special attention The main issue faced by these paradigms is that

traditional solutions cannot be directly applied to address the challenges Therefore there is a significant need to develop improved network management and cyber security solutions To this end this book highlights the challenges faced by emerging paradigms and presents the recent developments made to address the challenges More specifically it presents a detailed study on security issues in distributed computing environments and their possible solutions followed by applications of medical IoT deep learning IoV healthcare etc Advances in Cryptology - EUROCRYPT 2005 Ronald Cramer,2005-05-09 This book constitutes the refereed proceedings of the 24th Annual International Conference on the Theory and Applications of Cryptographic Techniques EUROCRYPT 2005 held in Aarhus Denmark in May 2005 The 33 revised full papers presented were carefully reviewed and selected from 190 submissions The papers are organized in topical sections on cryptanalysis theory encryption signatures and authentication algebra and number theory quantum cryptography secure protocols and broadcast encryption and traitor tracing **Proceedings of the 1993 International Conference on Parallel Processing** Salim Hariri,P. Bruce Berra,1993-08-16 This three volume work presents a compendium of current and seminal papers on parallel distributed processing offered at the 22nd International Conference on Parallel Processing held August 16 20 1993 in Chicago Illinois Topics include processor architectures mapping algorithms to parallel systems performance evaluations fault diagnosis recovery and tolerance cube networks portable software synchronization compilers hypercube computing and image processing and graphics Computer professionals in parallel processing distributed systems and software engineering will find this book essential to complete their computer reference library Information and Communications Security Yongfei Han,Sihan Quing,1997-10-22 This book constitutes the refereed proceedings of the First International Conference on Information and Communication Security ICICS 97 held in Beijing China in November 1997 The 37 revised full papers presented were selected from a total of 87 submissions Also included are 11 short papers The book is divided in sections on theoretical foundations of security secret sharing network security authentication and identification Boolean functions and stream ciphers security evaluation signatures public key systems cryptanalysis of public key systems subliminal channels key recovery intellectual property protection protocols and electronic commerce
