Mikhail Noginov, 2006-07-04 Random lasers are the simplest sources of stimulated emission without cavity with the feedback provided by scattering in a gain medium First proposed in the late 1960s random lasers have grown to a large research field This book reviews the history and the state of the art of random lasers provides an outline of the basic models describing their behavior and describes the recent advances in the field The major focus of the book is on solid state random lasers However it also briefly describes random lasers based on liquid dyes with scatterers The chapters of the book are almost independent of each other So the scientists or engineers interested in any particular aspect of random lasers can read directly the relevant section Researchers entering the field of random lasers will find in the book an overview of the field of study Scientists working in the field can use the book as a reference source **Subject Guide to Books in Print**, 1984

Literature 1976, Part 1 S. Böhme, U. Esser, W. Fricke, U. Güntzel-Lingner, I. Heinrich, F. Henn, D. Krahn, L. D. Schmadel, H. Scholl, G. Zech, 2013-11-11 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970

Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. Volume 17 contains literature published in 1976 and received before August 15, 1976; some older literature which was received late and which is not recorded in earlier volumes is also included. We acknowledge with thanks contributions to this volume by Dr J Bouska who surveyed journals and publications in the Czech language and supplied us with abstracts in English and by the Commonwealth Scientific and Industrial Research Organization CSIRO Sydney for providing titles and abstracts of papers on radio astronomy. We want to acknowledge valuable contributions to this volume by Zentralstelle für Atomkernenergie Dokumentation Leopoldshafen which supported our abstracting service by sending us retrospective literature searches.
