It provides broad coverage including both religious and non-religious fasting and dietary restrictions. This practical and evidence-based guide outlines recent findings. Nature-Inspired Optimization Algorithms for Cyber-Physical Systems Sajid, Mohammad, Shahid, Mohammad, Lapina, Maria, Babenko, Mikhail, Singh, Jagendra, 2024-12-06
Cyber physical systems CPS integrate computation communication control and physical elements to achieve shared goals with minimal human intervention encompassing smart technologies such as cities cloud computing and smart grids. As CPS components expand generating vast amounts of data they face challenges in areas like resource management security computation offloading and automation demanding advanced techniques beyond traditional algorithms. Nature inspired optimization algorithms drawing on natural phenomena offer scalable and adaptable solutions for these complex issues making them essential for addressing CPS challenges efficiently and enhancing their role in our daily lives. Nature Inspired Optimization Algorithms for Cyber Physical Systems provides relevant theoretical frameworks and the latest empirical research findings in the area. It explores the nature inspired optimization algorithms intended to boost the performance of CPS. Covering topics such as ant colony optimization data analysis and smart cities this book is an excellent resource for teaching staff researchers academicians graduate and postgraduate students and more. **AI and Its Convergence With Communication Technologies** Muneer, Badar, Shaikh, Faisal Karim, Mahoto, Naeem, Talpur, Shahnawaz, Garcia, Jordi, 2023-08-25
The integration of Artificial Intelligence AI with Communication Technologies ICT is a critical aspect of research and development today but it poses numerous challenges and bottlenecks. To address these issues the book AI and Its Convergence with Communication Technologies edited by a team of expert scholars provides a comprehensive overview of the state of the art research and practical challenges related to AI's convergence with ICT. It is designed to benefit engineers professionals scientists and academicians providing them with insights into the ICT industry and research from an AI perspective. The book covers a wide range of topics including recent advancements and applications in AI: AI in signal processing AI in mobile and modern wireless networks and AI towards automation. It also addresses potential applications of AI in national defense military technology hybrid warfare medical and health sciences and energy efficient systems. Furthermore the book highlights the strengths and weaknesses of AI convergence with ICT along with emerging frontiers and recommendations. It provides a brief history of AI in ICT and a comprehensive introduction to ICT related methods and techniques in artificial intelligence and machine learning. The book emphasizes the role of AI in extracting knowledge and making predictions in decision making strategies for businesses management and governance.

Overall this book offers a significant contribution to the understanding of AI and its convergence with communication technologies making it a must read for scholars and researchers who seek to understand the intersection of AI and ICT and how it impacts modern industries and research
