Anthropology Of Economy Community Market And Culture:

Anthropology and Economy Stephen Gudeman, 2016-01-07 Offering a uniquely cross cultural perspective renowned economic anthropologist Stephen Gudeman presents a theory of economic crisis and lessons for its mitigation in light of the recent global financial crash This compelling book is richly illustrated with examples from strange small scale economies as well as developed market economies Economy's Tension Stephen Gudeman, 2008 Using a cross cultural model the author explores mystifications of economic life and explains how capital and derivatives can control an economy The book offers a different conception of economic welfare development and freedom **Economy and Ritual** Stephen Gudeman, Chris Hann, 2017-05 According to accepted wisdom rational practices and ritual action are opposed Rituals drain wealth from capital investment and draw on a mode of thought different from practical ideas The studies in this volume contest this view Comparative historical and contemporary the six ethnographies extend from Macedonia to Kyrgyzstan Each one illuminates the economic and ritual changes in an area as it emerged from socialism and re entered market society Cutting against the idea that economy only means markets and that market action exhausts the meaning of economy the studies show that much of what is critical for a people s economic life takes place outside markets and hinges on ritual understood as the negation of the everyday world of economising The Matthean Community and the World James P. Grimshaw, 2008 This study of the Matthean narrative uses the interpretive lens of food exchange to explore the Matthean community s relationship with the wider world While many studies depict this community as withdrawing from or in conflict with the larger society James P Grimshaw s focus on the daily need for food reveals a community that while distinct progressively integrates itself into the larger Jewish and Gentile society and the natural world In addition this view of community corresponds to the view of a God who actively provides for and relates to all creation Grimshaw s alternative portrayal of the Matthean community whose interactions with its surrounding environment are more complex and sustained than often imagined is a compelling interpretation for today s stratified and disconnected world **Navigating Austerity** Laura Bear, 2015-08-19 Navigating Austerity addresses a key policy question of our era what happens to society and the environment when austerity dominates political and economic life To get to the heart of this issue Laura Bear tells the stories of boatmen shipyard workers hydrographers port bureaucrats and river pilots on the Hooghly River a tributary of the Ganges that flows into the Bay of Bengal and Indian Ocean Through their accounts Bear traces the hidden currents of state debt crises and their often devastating effects Taking the reader on a voyage along the river Bear reveals how bureaucrats entrepreneurs and workers navigate austerity policies Their attempts to reverse the decline of ruined public infrastructures environments and urban spaces lead Bear to argue for a radical rethinking of economics according to a social calculus This is a critical measure derived from the ethical concerns of people affected by national policies It places issues of redistribution and inequality at the fore of public and environmental plans Concluding with proposals for restoring more just long term social obligations

Bear suggests new practices of state financing and ways to democratize fiscal policy Her aim is to transform sovereign debt from a financial problem into a widely debated ethical and political issue Navigating Austerity contributes to policy studies as well as to the understanding of today's global injustices It also develops new theories about the significance of state debt speculation and time for contemporary capitalism Sited on a single body of water flowing with rhythms of circulation renewal and transformation this ambitious and accessible book will be of interest to specialists and general readers *Fair Trade and a Global Commodity* Peter Luetchford, 2007-11-20 Fair trade is widely regarded as a universal good This fascinating anthropological study takes a closer look at a coffee growing community and cooperatives in Costa Rica and subjects the fair trade movement to critical scrutiny As with conventional coffee Western demand for organic fair trade produce is largely met by more affluent individuals with larger landholdings As a result it is caught up in the conflicts of interest and resentments that are part of the coffee industry as a whole Ultimately fair trade fails to escape divisions that characterise other forms of production and consumption All growers are united in their criticism of the high margins accumulated by regional and transnational processors and exporters Sustainability just rewards and social cohesion have formed part of the world view of these agricultural communities for decades This book shows how there is much common ground between the worlds of the commodity grower and the priorities of the fair trade movement if not necessarily always in the ways we might suppose

The Seal Hunt Nikolas Sellheim, 2018-08-13 In *The Seal Hunt Cultures Economies and Legal Regimes* Nikolas Sellheim offers a deep analysis of the seal hunt worldwide He engages on a journey from the northern to the southern hemisphere and explores how the seal hunt has shaped cultures all over the world up to this day By analysing the different national and international regimes dealing with the seal hunt Sellheim shows how the perception of the seal and the seal hunt has changed over time and space Focusing on the European Union and the World Trade Organization the volume offers an account on how opposition towards the seal hunt has found its way onto the international spheres of governance and trade

Microfinance, Debt and Over-Indebtedness Isabelle Guérin, Solène Morvant-Roux, Magdalena Villarreal, 2013-10-15 Although microcredit programmes have long been considered efficient development tools many forms of debt induced distress have emerged in their wake This has brought to light the problem of over indebtedness a topic which has been previously underexplored in the literature This new book from a group of leading scholars explores the manifestations scale and economic and social implications of household over indebtedness in areas conventionally considered as financially excluded The book approaches debt not only as a financial transaction but also as a form of social bond and offers a socioeconomic analysis of over indebtedness The volume puts forward a broad definition of over indebtedness highlighting its situational and semantic complexity and diversity It provides a close analysis of local conceptions of debt and over indebtedness highlighting frameworks of calculation and the constant renegotiation of their boundaries On top of this it looks far beyond microcredit to examine all the financial practices that individuals juggle The volume argues that over

indebtedness has more to do with social inequalities than financial illiteracy and should therefore be understood in the light of global trends of financialization. It also reveals the ambiguity of financial inclusion policies and in many respects questions the actions of new credit providers. This book will be valuable reading for students, researchers and policy makers interested in microfinance and development issues. *The Informal Post-Socialist Economy* Jeremy Morris, Abel Polese, 2013-12-13

From smugglers to entrepreneurs, blue collar workers and taxi drivers, this book deals with the multitude of characters engaged in informal economic practices in the former socialist regions. Going beyond a conception of informality as opposed to the formal sector, its authors demonstrate the fluid nature of informal transactions straddling the crossroads between illegal, illicit, socially acceptable and symbolically meaningful practices. Their argument is informed by a wide range of case studies from Central Europe to the Baltics and Central Asia, each of which is constructed around a single informant. Each chapter narrates the story of a composite person or household that was carefully selected or constructed by an author with long standing ethnographic research experience in the given field site. Wide in geographical, empirical and theoretical scope, the book uses ethnographic narrative accounts of everyday life to make links between ordinary meanings of informality. Challenging reductively economic perspectives on cross border trading, undeclared work and other informal activities, the authors illustrate the wide variety of interpretive meanings that people ascribe to such practices. Alongside getting by and getting ahead in recently marketised societies, these meanings relate to sociality, kinship ties and solidarity, along with more surprising political and moral reasonings. **The Drug Effect** Suzanne Fraser, David Moore, 2011-09-05. *The Drug Effect: Health, Crime and Society* offers new perspectives on critical debates in the field of alcohol and other drug use. Drawing together work by respected scholars in Australia, the US, the UK and Canada, it explores social and cultural meanings of drug use and analyses law enforcement and public health frameworks and objectives related to drug policy and service provision. In doing so, it addresses key questions of drug use and addiction through interdisciplinary, predominantly sociological and criminological perspectives, mapping and building on recent conceptual and empirical advances in the field. These include questions of materiality and agency, the social constitution of disease and neo-liberal subjectivity and responsibility. This book provides a fresh scholarly perspective on drug use and addiction by collecting top quality original work written by a mix of international leaders in the field and emerging scholars working at the cutting edge of research.
