

However, those for Britain and France are somewhat dated by publications of the past several years.

Flamm does not discuss how the computer industry grew out of the business machine industry, nor does he discuss, at the other end, the changed environment of the microcomputer. Neither is full justice given to the computer software and service industries, separate from the hardware systems industry. In all fairness, however, the account here should be considered in tandem with that in his companion volume, *Targeting the Computer* (Washington, DC, 1987). As a historian without formal training in economics, I will not try to assess Flamm's final section but will merely describe its contents: the pace of technological progress, economies of scale and scope, reaping the benefits of research investment, technological differentiation and competition, the Japanese challenge, the role of government in computer innovation, and implications for current high-technology industries.

The Anti-Redeemers: Hill-Country Political Dissenters in the Lower South from Redemption to Populism. By Michael R. Hyman. Baton Rouge: Louisiana State University Press, 1990. Pp. ix, 252. \$39.95, cloth; \$16.95, paper.

The economic, political, and social metamorphoses of the pre- to post-Civil War South have captured the attention of countless scholars, but surprisingly little work has concentrated on the predominantly white regions, typically referred to as the "Upcountry" or "Hill-Country." Although the "Cotton South" has traditionally borne the brunt of our research endeavors, historians have only recently begun to study the political economy of those areas that, in the antebellum period, sat on the periphery of the cotton economy. The works of Charles Flynn, Lacy Ford, Steven Hahn, and David Weiman have shown that in order to understand more completely the economic and political developments of the postbellum South, an analysis of the upcountry must be included. Michael Hyman's study of post-Reconstruction political dissent among ordinary upcountry citizens fits nicely into this burgeoning literature.

"The study's main objective is to understand the political ideology of white small producers in the post-Reconstruction South by examining their ideas and attitudes concerning the relationship of government to socioeconomic developments" (pp. 25-26). At the root of political dissent in the postwar upcountry, according to Hyman, was the rapid process of commercialization which exposed farmers to the usual villains: "increasing debt, decreasing self-sufficiency, and declining cotton prices" (p. 13). As market relations spread throughout the upcountry, elites ("merchants and related interests") began to consolidate their political power in order to capture control of the rapidly developing market economy. It was "the appropriation of political power by special interest groups [that] threatened the most cherished political beliefs of hill-country small producers, as well as their economic well-being" (p. 30). In order to demonstrate how and why these small producers reacted to the usurpation of political power in the post-Reconstruction South, Hyman studies a broad array of public policy issues of the 1870s and 1880s.

Perhaps the most interesting and convincing chapter focuses on the local political conflicts that surrounded the decision to support railroad construction and/or to build county roads and courthouses. In his telling of Jackson County's (Georgia) courthouse imbroglio of the late 1870s, Hyman cleverly portrays the political frustration that many upcountry residents must have felt as they were overcome by more powerful interests. The Jackson story is worthy of a brief retelling. In August 1877, Jackson County's grand jury recommended the building of a new courthouse and suggested that a suitable building could be constructed for \$6,000. Since the grand jury recommended building
