A History Of Experimental Virology:

A History of Experimental Virology Alfred Grafe, 1991-11-29 By their powers of reason scientists will be able to extract from nature the answers to their questions From Critique of Pure Reason 1781 Immanuel Kant 1724 1804 German Philosopher History is a composite of stories The history of the biological disciplines has been written by all those who opened the gates of new knowledge by generating ideas and the experiments to support them Previous authors have attempted various approaches to the history of virology as is reflected in the numerous books and book series issuing from the publishing houses This volume is an attempt at a comprehensive yet compact survey of virology which has meant penetrating the rigid limits of the separate disciplines of biology in which virologists have worked Writing this history of experimental virology was really a search for the origins and for vital signposts to portray the wide scope of the knowledge attained thus far This was done in complete awareness of the fact that every presentation depends heavily upon the perspective of the observer and of necessity communicates only a part of the whole The present scientific story hopes to recount the most important knowledge achieved during this past century the first century of the exciting developments in virology

Crafting Immunity Jennifer Keelan, 2017-03-02 Immunity is as old as illness itself yet historians have only just begun to take up the challenge of reconstructing the modern transformation of attempts to protect against disease Crafting Immunity assembles in one volume the most recent efforts of an international group of scholars to place the diverse practices of immunity in their historical contexts It is this diversity that provides the book with its greatest source of strength Collectively the papers in this volume suggest that it was the craft like small scale and local conditions of clinical medicine that turned the immunity of individuals and populations into biomedical objects That is to say the modern conception of immunity was at least as much the product of the work of healing as it was the systematic result of discoveries about the immune system Working outside the narrow confines of laboratory histories Crafting Immunity is the first attempt to set the problems of immunity into a variety of social technological institutional and intellectual contexts It will appeal not only to historians and sociologists of health but also to social and cultural historians interested in the biomedical creation of modern health regimens

Modern Flu Michael Bresalier, 2023-09-09 Ninety years after the discovery of human influenza virus *Modern Flu* traces the history of this breakthrough and its implications for understanding and controlling influenza ever since Examining how influenza came to be defined as a viral disease in the first half of the twentieth century it argues that influenza s viral identity did not suddenly appear with the discovery of the first human influenza virus in 1933 Instead it was rooted in the development of medical virus research and virological ways of knowing that grew out of a half century of changes and innovations in medical science that were shaped through two influenza pandemics two world wars and by state sponsored programs to scientifically modernise British medicine A series of transformations in which virological ideas and practices were aligned with and incorporated into medicine and public health underpinned the viralisation of influenza in the 1930s and 1940s Collaboration conflict and exchange between researchers medical professionals and governmental bodies lay at the heart of this process This book is a history of how virus researchers clinicians and epidemiologists medical scientific and public health bodies and institutions and philanthropies in Britain the USA and beyond forged a new medical consensus on the identity and nature of influenza Shedding new light on the modern history of influenza this book is a timely account of how ways of knowing and controlling this intractable epidemic disease became viral
