Biographical Objects Janet Hoskins, 1998 In this innovative study six women and men from Eastern Indonesia narrate their own lives by talking about their possessions domestic objects used to construct a coherent identity through a process of identification and self historicizing Janet Hoskins explores how things are given biographical significance and entangled in sexual politics expressed in dualistic metaphors where the familiar distinctions between person and object and female and male are drawn in unfamiliar ways Biographical Objects is an ethnography of persons which takes the form of a study of things showing how the object is not only a metaphor for the self but a pivot for reflexivity and introspection a tool for autobiographic elaboration a way of knowing oneself through things

Historical, Biographical, and Descriptive Catalogue of the Objects Exhibited at the Southampton Art Museum, Established at Southampton, New York Samuel Longstreth Parrish, 1898

Writing the Lives of People and Things, AD 500-1700 Robert F.W. Smith, Gemma L. Watson, 2017-05-15 Historical biography has a mixed reputation at its best it can reveal much not only about an individual but the wider context of their life and society at worst it can result in a narrowly focused work of hagiography or condemnation Yet in spite of its sometimes inferior status amongst academics biography has remained a popular genre and in recent years has developed into new and intriguing areas As the essays in this volume reveal scholars from an array of different disciplines have embraced what biography can offer them expanding the remit of biography from people to things tracing the life of their chosen object from creation to use to disposal to rediscovery The increasing concern with the physicality of manuscripts and books has also meant an awareness of and interest in the lives of these forms of material

culture Historians have also become increasingly interested in groups of individuals resulting in prosopographical studies A book on the diversity of biography is therefore very timely exploring the multi disciplinary application of historical biography in the period 500 1700 It presents fourteen case studies offering new approaches to historical biography written by early career researchers from backgrounds in archaeology English art architectural history and history demonstrating different approaches and techniques Overall the collection is a strong and united statement by a group of early career researchers who insist on the vitality of biography as a central concern of historians across the disciplines of the humanities Contributors believe that the life is a fundamental medium of study for the medieval and early modern periods and thus bolsters the move back towards biography as a primary tool of medieval and early modern scholars as well as a tool for future research for humanities scholars interested in biography

Handbook of Material Culture Christopher Y. Tilley, 2006-01-26 Provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things This handbook charts an interdisciplinary field of studies that makes a fundamental contribution to an understanding of what it means to be human

Mobility, Meaning and Transformations of Things Hans Peter Hahn, Hadas Weis, 2013-01-31 Things travel around the globe they are shipped as mass consumer goods or transported as souvenirs or gifts There are infinite ways for things to be mobile not only in the era of globalisation but since the beginning of time as the earliest traces of long distance trading show This book investigates the mobility of things from archaeological and anthropological perspectives Material Objects are characterised by temporal continuity embodying a prior existence with lingering effects Yet the material continuity disguises the transformations they may undergo which only become evident upon closer examination Objects are in perpetual flux leaving visible traces of their age usage and previous life While travelling through time objects also circulate through space and their spatial mobility alters their meaning and use with respect to new cultural horizons As objects transform through time and space so does the value attributed to them Mapping out itineraries of value in the realm of the material allows us to grasp the nature of a given social formation through the shape and meaning taken on by its valued stuff It also provides insights into the nature of materiality through the value ascribed to objects at a given point in time and space This edited volume brings together studies of material culture materiality and value with regard to the mobility of objects with the aim of tracing the ways in which societies constitute their valued objects and how the realm of the material reflects upon society

Women and Personal Property in the Victorian Novel Deborah Wynne, 2016-02-17 How key changes to the married women s property laws contributed to new ways of viewing women in society are revealed in Deborah Wynne s study of literary representations of women and portable property during the period 1850 to 1900 While critical explorations of Victorian women s connections to the material world have tended to focus on their relationships to commodity culture Wynne argues that modern paradigms of consumerism cannot be applied across the board to the Victorian period Until the passing of the 1882 Married Women s Property Act many women lacked full property

rights evidence suggests that for women objects often functioned not as disposable consumer products but as cherished personal property Focusing particularly on representations of women and material culture in Charles Dickens George Eliot and Henry James Wynne shows how novelists engaged with the vexed question of women s relationships to property Suggesting that many of the apparently insignificant items that clutter the Victorian realist novel take on new meaning when viewed through the lens of women s access to material culture and the vagaries of property law her study opens up new possibilities for interpreting female characters in Victorian fiction and reveals the complex work of thing culture in literary texts

Human Nature and Social Life Jon Henrik Ziegler Remme, Kenneth Sillander, 2017-06-15 The book explores how humans are distinct social beings whose relations nevertheless extend into nonhuman spheres in various ways

Archaeological Perspectives on Burial Practices and Societal Change Frida Espolin Norstein, Irene Selsvold, 2024-11-07 Archaeological Perspectives on Burial Practices and Societal Change examines the relationships between burial practices and societal transformations in the past This book highlights the centrality of burials as archaeological material for the understanding of societal change It critically reassesses past approaches and suggests new ways of understanding the relationship between burial practice and change in archaeology Particular attention is given to archaeological periods where change was especially intense so called transition periods The volume has a wide chronological and geographical scope spanning the Early Bronze Age to the present day and ranging geographically from Cyprus to Scandinavia Recent developments within archaeological methods and theory have sparked discussions about the mechanisms and reasons behind societal changes in the past This book aims to revive interest in understanding and explaining these changes which are fundamental questions to the discipline of archaeology The volume is organised into three thematic parts The first Practices Communities and Agents of Change examines the roles individuals and communities play in transforming burial customs highlighting the non linear and often chaotic nature of these changes The second theme Migration Identities and Narratives of Change challenges traditional narratives of migration and identity formation proposing more nuanced understandings of how burial practices encapsulate these complex processes The final theme Transitions Tempos and Complexities explores the multifaceted nature of societal transitions emphasising the importance of diverse tempos and scales in understanding these shifts Archaeological Perspectives on Burial Practices and Societal Change is for students and researchers in archaeology primarily mortuary archaeology and archaeological theory
