Biological Membranes Aberrations In Membrane Structure And Function:

Biological Membranes Wiley, Manfred L. Karnovsky, Alexander Leaf, Liana Bolis, 1988-11-01 [Biological Membranes](#), 1988 **Glycolipids, Phosphoglycolipids, and Sulfoglycolipids** Morris Kates, 2013-06-29 The early history and development of the field of glycolipids was concerned mainly with the predominant glycolipids found in higher animal tissues namely the glycosphingolipids as has been extensively documented by J N Kanfer and S Hakomori in Volume 3 of this series The major glycolipids in organisms of the plant kingdom however such as bacteria yeasts and fungi algae and higher plants are glycosylglycerolipids although glycosphingolipids are also present as minor components in these organisms except for bacteria It is of interest that one of the pioneers in glycosphingolipid research Herbert E Carter also pioneered the discovery and structural elucidation of the plant galactosyldiacylglycerols This class of glycolipids is present in chloroplast membranes and must surely be one of the most ubiquitous and abundant natural substances in the world thereby deserving the attention of lipid biochemists It is therefore surprising to learn that in contrast to the glycosphingolipids which were discovered in the 1870s glycosylglycerolipids were not discovered until the 1950s Since that time investigations of the structure and distribution of these glycolipids have proceeded at an exponentially increasing rate and much information is now available for representatives of many genera of bacteria yeasts algae and higher plants Glycosylglycerolipids have also been identified in animal cells particularly in the brain testes and sperm *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 **Peroxisomes** G. Gordon Gibson, Brian G. Lake, 2013-04-08 Provides an update on several new aspects of peroxisome biology including the role of the peroxisome proliferator activated receptor The book covers morphological biochemical and molecular biological aspects of peroxisomes [Phospholipids and Signal Transmission](#) Raphael Massarelli, Lloyd A. Horrocks, Julian N. Kanfer, Konrad Löffelholz, 2013-06-29 Once Nietzsche said that human beings may be divided into two categories Apollonians and Dionysians By this the philosopher meant that there are human beings a who know what they are going to do in the long term future what we now call the grant application for the next 5 years i.e. Apollonians and b who barely know what they are going to do tomorrow morning before breakfast i.e. Dionysians To organize a symposium this symposium in particular a committee had to be formed either of individuals sharing both Nietzschean characteristics or of individuals possessing either characteristic Considering the rarity of the former type of subject this organizing committee was spontaneously formed by a typical sample of both types of individuals We first met in Perugia in 1988 Those of us who were Apollonians had thus a chance to organize a programme The Dionysians knew what was going to happen to them but of course did not know yet how to cope with it They duly did so every day of the meeting after breakfast The organizers decided that it would be a useful exercise to assemble experts having different perspectives but all pursuing a very rapidly developing aspect of cell biology They also hoped that these selected Apollonians and Dionysians would not merely recount their results but try to project the future through active interchanges of ideas and opinions with other

attendees **Recent Developments in Infant Nutrition** J.G. Bindels,A. Goedhart,H.K.A. Visser,2012-12-06 After 17 years the Nutricia Symposium returned to its home grounds in The Netherlands where the first five Symposia were held The objective Symposium was to bring together a limited number of opinion leaders and key researchers in selected topics of infant nutrition to discuss the current state of the art based on original contributions and reviews The discussion sessions after the papers were taped and edited and may give additional information and views As a result of time constraints the discussions on a few papers had to be cut short or unfortunately could not take place at all Nevertheless we strongly recommend reading the discussion sections such as the panel discussion on the requirements for LCPUFA for term and or preterm infants During the preparation of the Symposium the sad news that Professor J H P Jonxis died prompted the organisers to dedicate one special lecture to the memory of the principal organiser of the first four Nutricia Symposia This lecture entitled What determines the production and composition of breast milk was given by Dr Kathleen Moti Acknowledgement should be made to the co organizers and co chairmen Professor Sir David HuH Professor Pieter Sauer and Dr Terence Stephenson for their contribution Finally without mentioning names the editors wish to thank a number of persons within the Nutricia organization without whom the Symposium and its Proceedings would not have been possible

Nuclear Science Abstracts ,1976 **Handbook of Essential Fatty Acid Biology** David I. Mostofsky,Shlomo Yehuda,2013-03-09 Internationally eminent scientists illuminate the most important scientific aspects of essential fatty acids EFAs from their biochemistry to their physiological consequences in both health and illness The distinguished contributors integrate a wide range of topics including the basic biochemistry of EFAs and lipid metabolism the role of EFAs in the neuronal membrane the effects of EFAs and lipids in various diseases and the effects of normal levels and EFA deficiencies on cognition and behavior The book's consolidation of our knowledge of the biology and metabolism of the EFAs lays the groundwork for dramatic advances in our understanding of these ubiquitous biochemicals and their role in health and illness
