

SKILLS TEST 11 & 12

READING

1 Read the article. Mark [✓] the seven things it talks about.

Technology has changed a lot in the last 30 years. Now, we have fast computers, the Internet, and smartphones. But some experts believe that computers will become a lot more "intelligent." Maybe they will become more intelligent than us.

What kind of changes will there be in the next 30 years? Well, here are some predictions.

- In the next ten years, we won't have "computers" – not like the laptops or monitors on our desks we have today. Computers will be in the things we wear. We will see

information, take videos, or send emails through our glasses. Our watches will know exactly where we are. If we are sick or not doing enough exercise, our T-shirts will know and tell us.

- In the next 20 years, we will eat anything we want, and we won't need to exercise. Nanobots – very, very small machines inside our bodies – will work our muscles and keep us fit.

- In the 2040s, if we want to change something about our bodies, it will be possible. If we want new lips, or

legs or hair, it will be very easy to change it. We won't have diseases. If our bodies get old, we can create younger parts.

- In 2045, it's possible that the nanobots inside us will connect us to the Internet. Our brains will become more powerful. And if the Internet "saves" all our memories and thoughts, then in a way, we will live forever.

Will all these things happen? And if so, won't it be scary? Soon, these will be questions we really have to think about!

- 1 We will have different kinds of technology in the future.
- 2 There will be more people in the future.
- 3 We will have computers in our clothes.
- 4 Technology will communicate with us.
- 5 Computers will help us be more healthy.

☐☐☐☐☐

- 6 We will be "young" for a longer time.

☐

- 7 We will use the Internet in a very different way.

☐

- 8 Our thoughts and memories will never disappear.

☐

- 9 The people who control the Internet will be very powerful.

☐

☐ 7

2 Read the article again. Mark these sentences T (true), F (false), or DS (doesn't say).

- 0 One prediction is that computers will be more clever than people in the next 30 years.

☒

- 1 There won't be a lot of technology in the future.

☐

- 2 Our clothes will record information about us.

☐

- 3 Food will be more healthy in the future.

☐

- 4 We will exercise on special new machines.

☐

- 5 People will have the bodies they really want.

☐

- 6 We won't use the Internet in the future.

☐

- 7 It's possible that everything we think and remember will be online.

☐

- 8 Most people will not use this new technology.
