30 St Mary Axe A Tower For London:

30 St Mary Axe Ken Powell, 2006 Written by architecture critic Kenneth Powell *30 St Mary Axe A Tower for London* tells the story of the genesis design development construction and public reception of one of the world's most intelligently conceived and imaginatively designed buildings Each stage of the design process is described in detail from the first sketches and models to the creation of the spiralling atria which allow for natural ventilation and the unique steel diagrid which provides column free internal spaces This is followed by a photographic essay illustrating the key phases on site from the day construction started to the moment the lens was lifted into place The book concludes by drawing together the critical response to 30 St Mary Axe its prolific use in graphics advertising and films as an emblem of London and its role as a catalyst for other tall buildings in the city Norman Foster has described 30 St Mary Axe as a tremendous act of faith and confidence in the future This book reveals the powerful statement it makes about the future of both the workplace and the modern city

BOOK JACKET New Glass Architecture Brent Richards, Gilbert Dennis, 2006-01-01 A timely look at the ways in which glass is utilized in some of today's most beautiful and experimental building designs For centuries glass has provoked fascination with its properties as a versatile material that permits light to enter buildings in spectacular ways Much of modern architecture has been conceived by using glass to create increasingly minimal structures to promote the notion of lightweight construction solutions and to allow maximum daylight into buildings *New Glass Architecture* showcases the changing ways that aesthetics and methods for using glass have been developing since the 1990s The book begins with an introduction that traces the history of key moments in glass architecture from the stained glass windows of Chartres Cathedral to the Crystal Palace of 1851 and early constructions by John Soane Bruno Taut Le Corbusier and Mies van der Rohe Author Brent Richards explains the importance of glass artists in the second half of the 20th century and describes developments in glass technology over the last twenty years Beautifully illustrated with newly commissioned photographs by Dennis Gilbert the book features twenty five case studies of recent glass constructions from around the world by such leading architects as Foster and Partners Frank Gehry Herzog de Meuron Steven Holl Toyo Ito Associates Jean Nouvel Raphael Violy and Peter Zumthor Each building is illustrated in full color and accompanied by detailed drawings *New Glass Architecture* features these buildings and more Chapel of Ignatius Seattle Cond Nast Caf New York DZ Bank Berlin Kimmel Center for the Performing Arts Philadelphia Kunsthau Graz Austria Laban Dance Centre London Torre Agbar Barcelona

The Urban Towers Handbook Eric Firley, Julie Gimbal, 2011-06-20 *The Urban Towers Handbook* Eric Firley and Julie Gimbal with Philippe Honnorat For well over a century the modern skyscraper has provided an ingenious solution to high density living and working accommodating the greatest number of people in a building with a minimal footprint In the contemporary context of drastic urban growth its role can only gain in importance The question is how to avoid past mistakes and how to conceive the tower as a positive component of an existing or newly created urban fabric In a thoroughly analytical and

comparative way The Urban Towers Handbook provides answers to these questions and serves as a reference book and design tool for architects planners and developers alike Its comprehensive graphic documentation includes not only aerials and to scale plans and sections but also purpose made photography drawings and diagrams The core of the book is made up of over fifty case studies which have been classified according to three major typological groups and their respective sub groups solitaires clusters and vertical cities Twenty one of these examples feature detailed documentation including classics such as the Rockefeller Center in Manhattan and Torre Velasca in Milan as well as contemporary milestones such as Roppongi Hills in Tokyo and the making of Sheikh Zayed Road in Dubai Among others several districts in Hong Kong Shanghai and S o Paulo have been analysed as existing examples of vertical cities The case studies section of the book is consolidated by a second section that out lines high rise regulations in seven cities around the world and highlights how planning authorities use tall buildings for the realisation of their urban goals and visions The third and final section of the book addresses the uneasy relationship between high rise structures and sustainability placing the emphasis on the urban implications
