Adult Severe Mental Illness:

Group Therapy for Adults with Severe Mental Illness Diana Semmelhack, Larry Ende, Clive Hazell, 2013-02-11 Mental illness is prevalent in society with a quarter of individuals having a diagnosable mental illness. A growing percentage of these individuals develop severe disorders which incapacitate them and may leave them unemployed, lonely, isolated, and untreated. In recent years there has been a movement away from therapy and a heightened emphasis on medicalization. This book argues that medication alone does not take away the deep emotional pain of feeling isolated and lonely and considers the modification of the client's social relationships as a critical ingredient in any treatment. *Group Therapy for Adults with Severe Mental Illness* explores a non-traditional application of treatment known as the group as a whole model. This approach to group work derives from the Tavistock tradition in which emphasis on the whole group versus any specific member makes the group a safe place to risk sharing and confronting painful issues. This text highlights the efficacy of utilizing this model in the treatment of severely mentally ill consumers in various settings including jails, nursing homes, and group homes. Included in the book are case studies using the Tavistock method, the power of group as a whole, work in educating mental health professionals and graduate students, the use of the model to enhance creative expression in the arts, the use of the model to understand larger social systems. This text will be of value to mental health professionals, researchers, and educators interested in the treatment of severely mentally ill populations in institutional settings and individuals with a specific interest in group psychotherapy.

Young Adults with Serious Mental Illness Cornelia M. Ashby, 2009-02 The transition to adulthood can be difficult for young adults who suffer from a serious mental illness such as schizophrenia or bipolar disorder. When these individuals are unsuccessful, the result can be economic hardship, social isolation, and in some cases, suicide, all of which can pose substantial costs to society. This report provides information on: 1) the number of these young adults and their demographic characteristics; 2) the challenges they face; 3) how selected states assist them; and 4) how the federal government supports states in serving these young adults and coordinates programs that can assist them. To do this work, the author conducted site visits in Conn, Maryland, Mass, and Miss. 4 states that focus on this population. Illustrations.
