Adult Aphasia Rehabilitation:

Adult Aphasia Rehabilitation George Albyn Davis, M. Jeanne Wilcox, 1985 **Adult Aphasia Rehabilitation** Gloria Jean L. Wallace, 1996 Contributors look at issues in rehabilitation and management of aphasia discussing neglected areas such as working with individuals in culturally diverse populations and in rural communities as well as stroke prevention and the promotion of wellness Subjects include aphasia classification systems speech language and hearing assessment increasing motivation neuropsychological models of reading and psychological adjustment after a stroke Includes contacts for journals and newsletters associations grant sources and assessment and treatment materials Annotation copyright by Book News Inc Portland OR Adult Aphasia Rehabilitation G. Albyn Davis, M. Jeanne Wilcox, 1991-06-01 *The Handbook of Adult Language Disorders* Argye E. Hillis, 2013-05-13 This distinctive handbook is a key reference for both clinicians and researchers working in the scientific investigation of aphasia The focus is on how the study of acquired language disorders has contributed to our understanding of normal language and its neural substrates and to the clinical management of language disorders The handbook is unique in that it reviews studies from the major disciplines in which aphasia research is conducted cognitive neuropsychology linguistics neurology neuroimaging and speech language pathology as they apply to each topic of language For each language domain such as reading there is a chapter devoted to theory and models of the language task a chapter devoted to the neural basis of the language task focusing on recent neuroimaging studies and a chapter devoted to clinical diagnosis and treatment of impairments in that domain *Aphasia Treatment* Audrey L. Holland and Margaret M. Forbes, 2013-12-01 Language and Motor Speech Disorders in Adults Harvey Halpern, Robert M. Goldfarb, 2013 Rev ed of *Language and motor speech disorder in adults* Harvey Halpern 2nd ed c2000 The Aphasic Adult Helen G. Burr, 1965 **Language Intervention Strategies in Adult Aphasia** Roberta Chapey, 1994 This newly revised and updated Fourth Edition continues to focus on speech therapy addressing concerns that aid in the rehabilitation and recovery of aphasia patients Topics include assessment of language and communication principles of language intervention restorative approaches to language intervention cognitive neuropsychological approach implications functional intervention and treatment for each syndrome Other approaches and therapy for associated neuropathologies of speech and language related functions are also discussed For more information visit <http://connection.lww.com/go/chapey> **Rehabilitation of the Brain-Damaged Adult** Gerald Goldstein, Leslie Ruthven, 2013-03-07 Basic Issues in Rehabilitation of the Brain Damaged Definitions Because of the vagueness surrounding the term brain damage it is necessary at the outset to define the population to which this book may have some application Although it is usual to speak of the brain damaged patient in a general way the conditions referred to cover a variety of specific disorders In this book we will be discussing only individuals who become brain damaged as adults We will be addressing ourselves specifically to adults who have sustained demonstrable structural brain damage Those conditions in which brain dysfunction is a possible etiological agent such as a number

of functional psychiatric disorders will not be considered. Thus the entire topic of mental retardation and early life brain damage will not be treated here nor the many problems associated with minimal brain damage syndromes in school age children. Modern psychiatric thinking has tended to blur the distinction between the so called functional and organic disorders. d Shagass Gershon Friedhoff 1977 but we would add here to the view that the patient with structural brain damage continues to present relatively unique assessment and treatment problems. Furthermore the emphasis of this book will be placed on individuals with nonprogressive chronic brain damage.
