Aging Brain And Dementia New Trends In Diagnosis And Therapy:

Aging Brain and Dementia Leontino Battistin, Franz Gerstenbrand, 1990-01-16 The aging of the brain represents the most important problem among those related to aging in general and this book offers a full account of the processes occurring in both the normal aging and pathological brain Using a multidisciplinary approach *Aging Brain and Dementia* covers biological and clinical investigations of brain function and examines in detail epidemiological clinical biochemical psychological diagnostic and therapeutic aspects of aging brain and dementia The book includes findings that augment existing knowledge of when an impairment of metabolism and neurotransmission is still functional and therefore reversible and when it becomes morphological and irreversible In addition it shows how clinical advances lead to the successful evaluation of cognitive abilities and disorders of aged patients as well as those with dementia Molecular Basis of Aging Alvaro Macieira-Coelho, 2017-11-22 Using a new integrative approach *Molecular Basis of Aging* describes the aging phenomenon within mammalian organisms from the perspective of changes in information storage and coordination between hierarchical orders of structure This unique approach provides the reader with a thorough insight into the evolution of molecular cellular tissue and organ systems and processes in mammals This informative volume contains up to date reviews of **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1982 *Aging Brain and Dementia* , 1990 Current Catalog National Library of Medicine (U.S.), 1982 First multi year cumulation covers six years 1965 70 *Alzheimer's Disease. Epidemiology, Neuropathology, Neurochemistry, and Clinics* Konrad Maurer, Peter Riederer, Helmut Beckmann, 2013-03-14 The book *Alzheimer's Disease Epidemiology Neuropathology Neurochemistry and Clinics* is derived from an International Symposium on the occasion of the 125th Anniversary of the Birth of Alois Alzheimer 14 6 1864 19 12 1915 Over the past decade as the elderly have become the fastest growing segment of the population in industrialized countries Alzheimer's disease has emerged as one of the major mental health problems The contributors to this book represent internationally recognized authorities in the field of dementia and present new information about epidemiology neuropathology neurochemistry and clinics in Alzheimer's disease This book is a rich and valuable up to date resource for psychiatrists neurologists scientists working in the fields of neuropathology neurochemistry and molecular genetics behavioral scientists family physicians and all who share an interest in understanding and treating the older individual with Alzheimer's disease dementia *Age-associated Neurological Diseases* Lüder Deecke, Peter Dal-Bianco, 2013-03-13 The papers compiled in this supplementum are a selection of the best contributions presented at the 19 Central European Neurological Symposium CNS 19 held on June 29 July 1 1989 in Vienna The main topic of this conference was degenerative and age associated neurological diseases In recent decades life expectancy has dramatically increased at least in the industrialized countries This has led to extreme distortions of the so called population pyramids that no longer look like such but begin to almost resemble cylinders As a consequence of this overaging of the population diseases

that are associated with age have become much more common than before It was thus more than reasonable to devote a congress of the CNS series to these important neurological diseases The following fields of interest are covered Age associated memory impairment AAMI Alzheimer s and other dementias Parkinson s disease and other movement disorders stroke and others Concerning the de men tias some papers deal with diagnosis employing neuro imaging methods such as MRI CT PET and SPECT others using electrophysiological methods An important aspect in the early preclinical diagnosis of dementia is the inclusion of neuropsychological tests to enhance the chance of effective early treatment Also drugs that are now under clinical investigation are discussed and preliminary results are presented

Drug Addiction and AIDS

Norbert Loimer,Rainer Schmid,Alfred Springer,2012-12-06 AIDS and drug addiction is a topic of great and growing concern AIDS

first appeared among intravenous drug users in Europe in 1984 three years after the first cases were seen among homosexuals This epidemic has spread more rapidly among intravenous drug users than in any other risk group The high rates of HIV 1 seroprevalence among drug users in France Italy and Spain account for 85% of the total number of AIDS in intravenous drug users in Europe It is anticipated that HIV infected drug users will soon place a heavy burden on both drug treatment facilities and specialized health care units The HIV 1 epidemic will also cross the former iron curtain This contribution covers the wide and complex scene of drug problems and addiction as a whole It gives researchers an opportunity to obtain background information on the spread of HIV and AIDS among intravenous drug users as well as on the clinical and psychological effects of HIV 1 infection and AIDS in Europe The topics reviewed include surveys of intravenous drug use HIV prevalence detoxification risk reduction changing health behaviors evaluating AIDS interventions and the impact of methadone maintenance treatment This monograph will be of value to all clinicians researchers and policy makers who are concerned with the connection between intravenous drug use and AIDS
