Analytical Philosophy In Comparative Perspective:

Analytical Philosophy in Comparative Perspective Bimal K. Matilal, Jaysankar Lal Shaw, 2012-12-06 We are grateful to the authors who wrote papers specially for this volume and kindly gave their permission for printing them together None of these papers appeared anywhere before Our special thanks are due to the first six authors who kindly responded to our request and agreed to join this new venture which we are calling comparative perspective in analytical philosophy In the introductory essay certain salient points from each paper have been noted only to show how comparative perspective may add to and be integrated with modern philosophical discussion in the analytic tradition Needless to say any mistake possible misattribution or misrepresentation of the views of the original authors of the papers appearing in the said introductory essay is entirely the responsibility of the author of that essay The author apologizes if there has been such unintentional misrepresentation and insists that the readers should depend upon the original papers themselves for their own understanding For typographical problems it has not always been possible to use the symbols originally used by the authors but care has been taken to use the proper substitute for each of them Bimal K Matilal **ANALYTICAL PHILOSOPHY IN COMPARATIVE PERSPECTIVE AN INTRODUCTION** 1 The aim of this volume is to extend the horizon of philosophical analysis as it is practiced today **Analytical Philosophy in Comparative Perspective** Bimal K Matilal, Jaysankar Lal Shaw, 1984-12-31 **ANALYTICAL PHILOSOPHY IN COMPARATIVE PERSPECTIVE**, 1985 *Modern South Asian Thinkers* Dev Nath Pathak, Sanjeev Kumar H.M, 2025-10-30 This exceptional anthology brings together a collection of insightful expositions on modern South Asian thinkers and thoughts Employing an encyclopedic approach this volume delves deep into the intellectual history of South Asia transcending traditional academic perspectives and exploring a rich tapestry of ideas from various sources across time The book departs from the imported ideas of South Asia by delving into the diverse intellectual heritage of the region pertaining to political thinkers social and cultural thinkers and activists Historically the book aids in approaching the enduring social and political challenges in South Asia Drawing from an extensive array of works including polemics commentaries literary accounts politics and poetics modern thoughts in South Asia provide systematic solutions to the perennial issues that shape the region The curatorial consequence of the modern thoughts from the region put together in this compendium is a collective consciousness of South Asia as an offspring of the epistemological interface between region and universe The readers of this book shall arrive at a profound insight into the social political and cultural intricacies the transformative power of ideas and their enduring influence on the development of the region This book would be useful to students researchers and teachers working in the field of political science philosophy history and sociology in varied course curricula such as Indian political thought Eastern philosophy South Asian thought political thinkers and modern political thought *Modality and Meaning* W.G. Lycan, 2012-12-06 Part I of this book presents a theory of modal metaphysics in the possible worlds tradition Worlds themselves are understood as structured sets of properties this Ersatzist

view is defended against its most vigorous competitors Meinongianism and David Lewis theory of existent concrete worlds Related issues of essentialism and linguistic reference are explored Part II takes up the question of lexical meaning in the context of possible world semantics There are skeptical analyses of analyticity and the notion of a logical constant and an infinite polysemy thesis is defended The book will be of particular interest to metaphysicians possible world semanticists philosophers of language and linguists concerned with lexical semantics *Coming to Our Senses* Michael Devitt,1996 Professor Devitt takes up one of the most important difficulties that must be faced by philosophical semantics namely the threat posed by holism *The Unity of the Proposition* Richard Gaskin,2008-10-30 Richard Gaskin presents a work in the philosophy of language He analyses what is distinctive about sentences and the propositions they express what marks them off from mere lists of words and mere aggregates of word meanings respectively Since he identifies the world with all the true and false propositions his account of the unity of the proposition has significant implications for our understanding of the nature of reality He argues that the unity of the proposition is constituted by a certain infinitistic structure known in the tradition as Bradley's regress Usually Bradley's regress has been regarded as vicious but Gaskin argues that it is the metaphysical ground of the propositional unity and gives us an important insight into the fundamental make up of the world

Worlds and Individuals, Possible and Otherwise Takashi Yagisawa,2010 Takashi Yagisawa argues for a new version of modal realism the view that non actual possible worlds and individuals are as real as the actual ones He asserts that the notion of reality is primitive existence is a relation between a thing and a domain and ordinary objects are extended in spatial temporal and modal dimensions *Kristen Segerberg on Logic of Actions* Robert Trypuz,2013-10-22 This volume describes and analyzes in a systematic way the great contributions of the philosopher Kristen Segerberg to the study of real and doxastic actions Following an introduction which functions as a roadmap to Segerberg's works on actions the first part of the book covers relations between actions intentions and routines dynamic logic as a theory of action agency and deontic logics built upon the logics of actions The second section explores belief revision and update iterated and irrevocable beliefs change dynamic doxastic logic and hypertheories Segerberg has worked for more than thirty years to analyze the intricacies of real and doxastic actions using formal tools mostly modal dynamic logic and its semantics He has had such a significant impact on modal logic that It is hard to roam for long in modal logic without finding Kristen Segerberg's traces as Johan van Benthem notes in his chapter of this book **The Logic of Time** Johan van Benthem,2013-03-09 The subject of Time has a wide intellectual appeal across different disciplines This has shown in the variety of reactions received from readers of the first edition of the present Book Many have reacted to issues raised in its philosophical discussions while some have even solved a number of the open technical questions raised in the logical elaboration of the latter These results will be recorded below at a more convenient place In the seven years after the first publication there have been some noticeable newer developments in the logical study of Time and temporal expressions As far as Temporal Logic proper is concerned it seems fair to say that

these amount to an increase in coverage and sophistication rather than further break through innovation In fact perhaps the most significant sources of new activity have been the applied areas of Linguistics and Computer Science including Artificial Intelligence where many intriguing new ideas have appeared presenting further challenges to temporal logic Now since this Book has a rather tight composition it would have been difficult to interpolate this new material without endangering intelligibility
