

Fire Safety Handbook

for Apartment Managers

Introduction

Fire in an apartment building often involves more than one unit. Many building occupants may be affected. The dense nature of apartment living allows for the spread of smoke, heat, and fire.

Fire is always unexpected. Preparing for it shouldn't be. Responding to a fire requires quick decisions and fast actions in a setting that can be loud, smoky, dark, and hot. Lives and property can be saved by being prepared before fire strikes. The Seattle Fire Code and Washington State Law establish fire safety regulations for multi-residential housing. These rules require property owners to develop a fire emergency guide for tenants. They also require that tenants be informed about the fire protection equipment in the building.

This publication was developed to assist property managers in their fire safety efforts. This handbook will provide:

1. information to inform staff and tenants about home fire prevention and safety,
2. guidelines for developing a Code-required Fire Emergency Guide,
3. recommendations for developing fire emergency procedures and
4. an overview of what to expect from the Fire Department inspection process.
