An Introduction To Marxist Economic Theory:

An Introduction to Marxist Economic Theory Ernest Mandel, 2002 **An Introduction to Marxist Economic Theory** Ernest Mandel, 1969 **The Logic of Capital** Deepankar Basu, 2022-02-03 This book presents the main economic argument developed by Marx in the three volumes of Capital in a coherent and comprehensive manner. It also delves into three long standing debates in Marxist political economy: the transformation problem, the Okishio theorem, and theories of exploitation and oppression. Starting with discussions of methodology including dialectics and historical materialism, the book explains key concepts of Marxist political economy: commodity, value, money, capital, reserve army of labour, accumulation of capital, circuit of capital, reproduction schemas, prices of production, profit, interest, and rent. Scholars of economics, sociology, geography, political science, anthropology, and other kindred disciplines will find here an accessible yet rigorous treatment of Marxist political economy.

Introduction to Marxist Theory Ernest Mandel, 2021-01-30 This book contains a selection of essays on key subjects Mandel worked on: the theory of the state, imperialism, reformism, and bureaucracy. The Leninist Theory of Organisation is an influential essay on class consciousness and organisation. The Introduction to Marxist Economic Theory was widely used as a textbook in classes on Marxist economics. This book is the first in a series of selected writings by Ernest Mandel.

An Introduction to Marxist Economics George Catephores, 1989 This text presents an elementary exposition of the basic principles of Marxist economics from the central ideas of Marx himself through the reassessments made by subsequent Marxian economists. The work is aimed at students of Marxist studies and related courses.

Understanding Capital Duncan K. Foley, 1986-11-23 *Understanding Capital* is a brilliantly lucid introduction to Marxist economic theory. Duncan Foley builds an understanding of the theory systematically from first principles through the definition of central concepts to the development of important applications. All of the topics in the three volumes of Capital are included, providing the reader with a complete view of Marxist economics. Foley begins with a helpful discussion of philosophical problems readers often encounter in tackling Marx, including questions of epistemology, explanation, prediction, determinism, and dialectics. In an original extension of theory, he develops the often neglected concept of the circuit of capital to analyze Marx's theory of the reproduction of capital. He also takes up central problems in the capitalist economy: equalization of the rates of profit, the transformation problem, productive and unproductive labor, and the division of surplus value and the falling rate of profit. He concludes with a discussion of the theory of capitalist crisis and of the relation of Marx's critique of capitalism to his conception of socialism. Through a careful treatment of the theory of money in relation to the labor theory of value, Foley clarifies the relation of prices to value and of Marx's categories of analysis to conventional business and national income accounts, enabling readers to use Marx's theory as a tool for the analysis of

practical problems The text is closely keyed throughout to the relevant chapters in Capital and includes suggestions for further reading on the topics discussed **Free to Lose** John E. Roemer, 1988 Roemer challenges the morality of an economic system based on private ownership of the means of production Unless you start with a certain amount of wealth in such a society you are only free to lose This book addresses crucial questions of political philosophy and normative economics

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
