Analogies At War:

Analogies at War Yuen Foong Khong, 2020-05-05 From World War I to Operation Desert Storm American policymakers have repeatedly invoked the lessons of history as they contemplated taking their nation to war Do these historical analogies actually shape policy or are they primarily tools of political justification Yuen Foong Khong argues that leaders use analogies not merely to justify policies but also to perform specific cognitive and information processing tasks essential to political decision making Khong identifies what these tasks are and shows how they can be used to explain the U S decision to intervene in Vietnam Relying on interviews with senior officials and on recently declassified documents the author demonstrates with a precision not attained by previous studies that the three most important analogies of the Vietnam era Korea Munich and Dien Bien Phu can account for America s Vietnam choices A special contribution is the author s use of cognitive social psychology to support his argument about how humans analogize and to explain why policymakers often use analogies poorly

The Road to War in Iraq: Comparative Foreign Policy Analysis Chris Featherstone, 2025-04-09 This book combines three Foreign Policy Analysis FPA models to explain both how and why the US and UK decided to invade Iraq in 2003 These three FPA models each examine a different but closely related aspect of the individual level of decision making Firstly Groupthink examines how pathologies of small group decision making affected the processes in the US and UK decision to invade Iraq Secondly the Leadership Style framework examines how the individual leader s style of exercising their leadership affected the navigation of the decision making process Thirdly analogical reasoning examines how decision makers frame their actions both in their own decision making and in how they present their decision to the wider public By achieving these objectives The Road to War contributes to the field of FPA and to our understanding of how the decision to invade Iraq was taken The comparative use of these FPA models within a single framework means that this book responds to the calls for multifactorial research within FPA proposing and testing a framework that provides more complex answers through adopting a multifactorial framework These more nuanced complex answers then reveal more about the role of the individuals involved in the decision to invade Iraq and how their cognition affected the process that led to the decision to invade

Thinking History, Fighting Evil David Bruce MacDonald, 2009-01-01 This accessible study critiques the rise of a new exceptionalism a victim centered nationalism promoted by American conservatives since the 1980s borrowing imagery and vocabulary from the civil rights era and political correctness movements of the left Thinking History Fighting Evil explores the instrumentalization of anti Americanism and anti-Semitism in the service of U S foreign policy paying attention to how conservatives approach far enemies Islamism near enemies Europe and Latin America and the enemies within the domestic left

Political Psychology David Patrick Houghton, 2025-10-31 What shapes political behavior more the situations in which individuals find themselves or the internal psychological makeup beliefs values and so on of those individuals This is perhaps the leading division within the psychological study of politics today Political Psychology Situations

Individuals and Cases 3rd edition provides a concise readable and conceptually organized introduction to the topic of political psychology by examining this very question Using this situationism dispositionism framework which roughly parallels the concerns of social psychology and cognitive neuroscience this book focuses on such key explanatory mechanisms as emotion cognition neuropolitics genopolitics personality beliefs and social identities to explore topics ranging from voting behavior and racism to terrorism and international relations The new edition is completely revised and contains new chapters to introduce and conclude the book as well as fundamentally updated material on for instance foreign policy decision making and electoral choice Houghton has also updated the text to bring us into the era of Donald J Trump to pick apart the results of the 2024 US presidential election and to include up and coming research in the areas of neuropolitics and genopolitics Houghton s clear and engaging examples directly challenge students to place themselves in both real and hypothetical situations which involve intense moral and political dilemmas This highly readable text will provide students with the conceptual foundation they need to make sense of the rapidly changing and increasingly important field of political psychology

What Causes War? Greg Cashman, 2013-07-29 Now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory s implications for restraining international violence Among the questions he explores are Are humans aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations

Between Crime and War Claire Oakes Finkelstein, Jens David Ohlin, Christopher J. Fuller, Mitt Regan, 2023 The threat posed by the recent rise of transnational non state armed groups does not fit easily within either of the two basic paradigms for state responses to violence The civilian paradigm focuses on the interception of demonstrable immediate threats to the safety of others The military paradigm focuses on threats posed by collective actors who pose a danger to the state s ability to maintain basic social order and at times the state The book suggests that we need not see the options as confined to this binary choice as it evaluates the philosophical and ethical implications of using both military and non military

frameworks for pursuing counterterrorism operations **Analogies at War** Jens Meierhenrich, 2010 Silent enim leges inter arma Cicero¹ What is war as we now use the term What are the consequences thereof for the meaning of law Under what conditions is the language of war necessary for capturing the demands on law in times of transition By examining the evolution of war talk and law talk and the implications thereof for rights talk this article examines the promise and limits of transformative law with particular reference to recent developments in the United States From the war on poverty to the war on crime and from the war on drugs to the war on terrorism the practice of law in the United States has taken its cue from the language of war To ascertain the meaning of language this article provides a discourse analysis of law and war in times of transition The article introduces modes of analogical reasoning and demonstrates the importance of analysing language for understanding law and public policy The analysis shows that decision makers use analogies not simply to justify law and public policy what I term rhetoric but also to perform specific cognitive and information processing tasks essential to decision making what I term reason Applying this framework for analysis to the case at hand the article traces the emergence of the war on terrorism and explains first how the language of war informed US responses to the terrorist attacks of 11 September 2001 and delineates second the consequences thereof for political rights and civil liberties *South Africa's 'Border War'* Gary Baines, 2014-02-27 South Africa's Border War provides a timely study of the war of words waged by retired South African Defence Force SADF generals and other veterans against critics and detractors The book explores the impact of the Border War on South African culture and society during apartheid and in the new dispensation and discusses the lasting legacy or afterlife of the war in great detail It also offers an appraisal of the secondary literature of the Border War supplemented by archival research interviews and an analysis of articles newspaper reports reviews and blogs Adopting a genuinely multidisciplinary approach that borrows from the study of history literature visual culture memory politics and international relations South Africa's Border War is an important volume for anyone interested in the study of war and memory or the modern history of South Africa **Waging War, Planning Peace** Aaron Rapport, 2015-05-07 As the U S experience in Iraq following the 2003 invasion made abundantly clear failure to properly plan for risks associated with postconflict stabilization and reconstruction can have a devastating impact on the overall success of a military mission In *Waging War Planning Peace* Aaron Rapport investigates how U S presidents and their senior advisers have managed vital noncombat activities while the nation is in the midst of fighting or preparing to fight major wars He argues that research from psychology specifically construal level theory can help explain how individuals reason about the costs of postconflict noncombat operations that they perceive as lying in the distant future In addition to preparations for Phase IV in the lead up to the Iraq War Rapport looks at the occupation of Germany after World War II the planned occupation of North Korea in 1950 and noncombat operations in Vietnam in 1964 and 1965 Applying his insights to these cases he finds that civilian and military planners tend to think about near term tasks in concrete terms seriously assessing the feasibility of the means they

plan to employ to secure valued ends For tasks they perceive as further removed in time they tend to focus more on the desirability of the overarching goals they are pursuing rather than the potential costs risks and challenges associated with the means necessary to achieve these goals Construal level theory Rapport contends provides a coherent explanation of how a strategic disconnect can occur It can also show postwar planners how to avoid such perilous missteps On "Other War": Lessons from Five Decades of RAND Counterinsurgency Research Austin Long,2002-07-30 The challenges posed by insurgency and instability have proved difficult to surmount This difficulty may embolden future opponents to embrace insurgency in combating the United States Both the current and future conduct of the war on terror demand that the United States improve its ability to conduct counterinsurgency COIN operations This study makes recommendations for improving COIN based on RAND s decades long study of it
