

Contemporary society

Contemporary society, according to social and political scientists, is characterized by at least three fundamental characteristics:

- increasing human interdependence through a network of technologies that is progressively increasing the world's globality
 - the power and depth of the structure of human ways, of the dominated by technological innovation represent an absolute novelty in human history
 - the need to improve social and ecological sustainability for all
- techniques, technological innovation, human capital, political democracy, and technological progress human development.

These are basic principles, but they are being tested.

These principles are the result of a number of fundamental changes that are increasingly transforming our daily lives, our social structures and processes, our mediated way of information, forcing these fundamental changes with improvements in the economy, the regulatory, technology and globalization changes in political and organizational structures, and the importance of human capital.

Improvement of life conditions

The WHO estimates that, at the beginning of the 21st century, about 10% of the world population will live in conditions of extreme poverty. In 1990, 18% of the world population lived extreme poverty. In 2010, the percentage had been reduced to 16%. Several development countries, in particular in the Americas, still suffer from social and economic inequalities, but the conditions have improved.
