Analysing Design Activity:

Analysing Design Activity Nigel Cross, Henri Christiaans, Kees Dorst, 1997-01-23 Design encompasses some of the highest cognitive abilities of human beings including creativity synthesis and problem solving A substantial and varied range of research methods has been developed and adopted for the analysis of design activity but until now it has been difficult to compare the work of different researchers using different methods This book contains the results of an international workshop held in Delft The Netherlands which focused on one particular research method that of protocol analysis Researchers from seventeen different leading centres around the world were invited to analyse the same video recordings of designers working on an engineering product design The 20 chapters in this book are the records of that workshop providing rich insights into the design process and an overview of accumulated knowledge on design from these researchers There is also a discussion of the properties and limitations of protocol analysis as a research technique for analysing design activity The book is a substantial contribution to developing understanding of the nature of design activity and is of value to researchers teachers and practitioners of design

Analysing Design Activity Kees Dorst, Technische Universiteit Faculteit van het Industrieel Ontwerpen, Workshop on Research in Design Thinking, 1995 *Analysing Design Thinking: Studies of Cross-Cultural Co-Creation* Bo Christensen, Linden J. Ball, Kim Halskov, 2017-08-03 The scientific analysis of design thinking continues to burgeon and is of considerable interest to academic scholars and design practitioners across many disciplines This research tradition has generated a growing corpus of studies concerning how designers think during the creation of innovative products although less focus has been given to analysing how designers think when creating less tangible deliverables such as concepts and user insights *Analysing Design Thinking Studies of Cross Cultural Co Creation* brings together 28 contributions from internationally leading academics with a shared interest in design thinking who take a close look at professional designers working on a project that not only involves soft deliverables but where a central role is played by co creation across multiple culturally diverse stakeholders This collection of detailed multi method analyses gives a unique insight into how a Scandinavian design team tackled a specific design task within the automotive industry over a four month design process All papers draw upon a common video based dataset and report analyses that link together a diversity of academic disciplines including psychology anthropology linguistics philosophy architecture management engineering and design studies The dataset affords multiple entry points into the analysis of design thinking with the selected papers demonstrating the application of a wide range of analytic techniques that generate distinct yet complementary insights Collectively these papers provide a coherent framework for analysing and interpreting design thinking in vivo through video based field studies

Designerly Ways of Knowing Nigel Cross, 2007-10-05 The concept Designerly Ways of Knowing emerged in the late 1970s alongside new approaches in design education This book is a unique insight into expanding discipline area with important implications for design research education and practice

Conversations Robin S. Adams, Junaid A. Siddiqui, 2016-04-15 Design is ubiquitous Speaking across disciplines it is a way of thinking that involves dealing with complex open ended and contextualized problems that embody the ambiguities and contradictions in everyday life It has become a part of pre college education standards is integral to how college prepares students for the future and is playing a lead role in shaping a global innovation imperative Efforts to advance design thinking learning and teaching have been the focus of the Design Thinking Research Symposium DTRS series A unique feature of this series is a shared dataset in which leading design researchers globally are invited to apply their specific expertise to the dataset and bring their disciplinary interests in conversation with each other to bring together multiple facets of design thinking and catalyze new ways for teaching design thinking Analyzing Design Review Conversations is organized around this shared dataset of conversations between those who give and those who receive feedback guidance or critique during a design review event Design review conversations are a common and prevalent practice for helping designers develop design thinking expertise although the structure and content of these reviews vary significantly They make the design thinking of design coaches instructors experts peers and community and industry stakeholders and design students visible During a design review coaches notice problematic and promising aspects of a designer s work In this way design students are supported in revisiting and critically evaluating their design rationales and making sense of a design review experience in ways that allow them to construct their design thinking repertoire and evolving design identity

Designerly Ways of Knowing and Thinking Nigel Cross, 2024-10-29 This book is an edited collection of key lectures and foundational publications by Professor Nigel Cross on creative design thinking This is an expanded and updated new edition of the previous version with three additional chapters The book investigates and explains the nature of designerly ways of knowing and thinking and offers rich insights into a field of study that provides important foundations for design education research and practice The view that designers have and use particular designerly ways of knowing and thinking developed from new approaches in design education and new empirical studies of design processes The concept was first clearly articulated by Professor Cross one of the most respected design researchers internationally Since then the field of study has grown considerably as both design education and design research have developed together into a practice based discipline influential across many spheres of design and innovation As an extensive review of scholarship and research and a resource for studying designerly ways of knowing and thinking the book will be of value to researchers teachers students and practitioners across all fields of design including engineering and architectural design industrial and product design software and service design It will also be of interest to those engaging in creative developments across a wide range of social and technological innovation

Quantitative Methods for Studying Design Protocols Jeff WT Kan, John S Gero, 2017-06-13 This book is aimed at researchers and students who would like to engage in and deepen their understanding of design cognition research The book presents new approaches for analyzing design thinking and proposes methods of measuring design processes These methods

seek to quantify design issues and design processes that are defined based on notions from the Function Behavior Structure FBS design ontology and from linkography A linkograph is a network of linked design moves or segments FBS ontology concepts have been used in both design theory and design thinking research and have yielded numerous results Linkography is one of the most influential and elegant design cognition research methods In this book Kan and Gero provide novel and state of the art methods of analyzing design protocols that offer insights into design cognition by integrating segmentation with linkography by assigning FBS based codes to design moves or segments and treating links as FBS transformation processes They propose and test information entropy as a means to capture the information carried by a linkograph and correlate it with the design outcomes

Style and Creativity in Design Chiu-Shui Chan, 2015-03-09 This book looks at causative reasons behind creative acts and stylistic expressions It explores how creativity is initiated by design cognition and explains relationships between style and creativity The book establishes a new cognitive theory of style and creativity in design and provides designers with insights into their own cognitive processes and styles of thinking supporting a better understanding of the qualities present in their own design An explanation of the nature of design cognition begins this work with a look at how design knowledge is formulated developed structured and utilized and how this utilization triggers style and creativity The author goes on to review historical studies of style considering a series of psychological experiments relating to the operational definition degree measurement and creation of style The work conceptually summarizes the recognition of individual style in products as well as the creation of such styles as a process before reviewing studies on creativity from various disciplines presenting case studies and reviewing works by master architects Readers will discover how creativity is initiated by design cognition A summary of the correlations between creativity and style expressed as a conceptual formula describing the cognitive phenomenon of style and creativity concludes the work The ideas presented here are applicable to all design fields allowing designers to comprehend and improve their design processes to produce creative stylistically unique products
