Topic: Sociology | Words: 887 | Pages: 3

Introduction

The terms ethics and morals are frequently used interchangeably, primarily when used in contexts where an individual's behavior or the goodness and badness of an action is in question; however, the two terms have different meanings. Ethics can be described as the values an individual uses to interpret whether any particular activity or behavior is considered acceptable and appropriate (Stanwick & Stanwick, 2016). While morals or morality at the very least, "is the effort to guide one's conduct by reason, that is, to do what there are the best reasons for doing while giving equal weight to the interests of others" (Rachels & Rachels, 2019, p. 13). Ethics originate from the social or external systems such as codes of conduct, while morals are from a person's principles regarding right and wrong. This essay will compare and contrast these two terms and then discuss how my worldview informs my ethics and morals by integrating biblical principles to support my presuppositions.

Comparisons between Ethics and Morals

The difference between these two terms can be expressed using two frameworks: the teleological frameworks and the deontological frameworks. The teleological frameworks focus on the consequences, good and bad, resulting from the actions and conduct of individuals (Stanwick & Stanwick, 2016). There are three teleological frameworks which include ethical egoism, utilitarianism, and Sidgwick's dualism. These three are also referred to as moral theories. First, I will discuss the teleological frameworks, then the deontological frameworks will

Nietzsche, Genealogy, Morality Richard

Schacht,1994-06-15 Nietzsche's On the Genealogy of Morals has become a prominent text of recent Western philosophy. An influence on psychoanalysis, antihistoricism and poststructuralism and an abiding challenge to ethical theory, the philosopher's book addressed many of the major philosophical problems and possibilities of modernity. In this collection of essays focusing on Nietzsche's book, twenty-five philosophers offer discussions of the book's central themes and concepts. They explore such notions as resentment, asceticism, slave and master moralities and what Nietzsche calls genealogy and its relation to other forms of inquiry in his work.
