Marinsky, 1961 GeR₄ Compounds and Ge(CH₃)₃R Compounds up to Cyclic Alkyl Groups Frank Glockling, 2013-06-29 The present volume opens the Gmelin series on organogermanium compounds that is those compounds containing at least one germanium to carbon bond This whole series is being coordinated by Professor J Satge of the Universite Paul Sabatier in Toulouse Germanium is of historical interest because its existence was predicted by Newlands in 1864 and by Mendeleeff in 1871 although it was not isolated until 1887 by Winkler Mendeleeff's predictions of the properties of germanium and its compounds by comparison with what was known of the chemistry of its neighbors silicon and tin proved remarkably accurate and included predictions of the existence of organic derivatives GeR and of their properties 4 Although significant applications are as yet lacking for organogermanium compounds in contrast to organo silicon tin and lead compounds there has been considerable interest in the parallel development of its chemistry Up to 1983 about 1500 publications have appeared on organogermanium chemistry The material of the present series will be grouped in a similar way as for the organotin series beginning with compounds containing only one germanium atom mononuclear compounds and continuing with binuclear up to polynuclear compounds Within each group the compounds are arranged by the kind of non carbon substituents rather than by following the usual Gmelin principle of the last position using the Gmelin system of elements *Our Analytical Chemistry and Its Future (Classic Reprint)* William Francis Hillebr, 2015-07-04 Excerpt from *Our Analytical Chemistry and Its Future* In an address read at Philadelphia nearly twelve years ago I gave expression to some thoughts on the condition of analytical chemistry in our country as the condition appeared to me then to be Those thoughts were based on an experience of many years during which I was engaged wholly in analytical work of a more than ordinarily exacting nature and especially upon observations that had been acquired in connection with several series of cooperative analyses of diverse materials Since then my attention has been no less given to analysis largely for the past eight years in a supervisory capacity however and I have had opportunity to note the conditions that now prevail with respect to chemical analysis and what an important bearing exact analytical work often has on problems of physical and electrochemistry metallurgy etc It seems to me then that I can choose
