A Woman Wanders Through Life And Science:

A Woman Wanders Through Life and Science Irena Koprowska, 1998-01-01 Irena Koprowska's autobiography chronicles the life and struggles of an immigrant woman who successfully pursued a career while raising a family. In the process, she became an award-winning physician, professor, and research pioneer at a time in history when it was believed a woman's place was in the home. Born in Warsaw in 1917, Irena Koprowska was married, pregnant, and a physician by the age of twenty-two. Forced to flee the Nazis first in Poland and then in France, she fled to Brazil in 1940. Four years later, she immigrated to the United States. Unable to speak English, she started her academic career as a volunteer at the Department of Pathology at Cornell University Medical College. During the years of her subsequent Research Fellowships at Cornell University Medical College, she worked with George N. Papanicolaou, inventor of the Pap smear. The two co-authored a case report of the earliest diagnosis of lung cancer by a sputum smear. Eight years later, she was appointed Assistant Professor of Pathology at State University of New York Downstate Medical College and went on to become the first woman physician to become a full professor at Hahnemann Medical College and Hospital, now known as Hahnemann University in Philadelphia. Later, she joined the faculty of Temple University Medical School, where upon her retirement in 1987, she became Professor Emerita. She was recognized as Woman Physician of the Year by a Gold Medicus award of the Polish American Society in 1977 and received the Papanicolaou Award of the American Society of Cytology in 1985.

Against Their Will Allen M. Hornblum, Judith L. Newman, Gregory J. Dober, 2013-06-25 During the Cold War, an alliance between American scientists, pharmaceutical companies, and the US military pushed the medical establishment into ethically fraught territory. Doctors and scientists at prestigious institutions were pressured to produce medical advances to compete with the perceived threats coming from the Soviet Union. In *Against Their Will*, authors Allen Hornblum, Judith Newman, and Gregory Dober reveal the little-known history of unethical and dangerous medical experimentation on children in the United States. Through rare interviews and the personal correspondence of renowned medical investigators, they document how children, both normal and those termed feeble-minded, from infants to teenagers, became human research subjects in terrifying experiments. They were drafted as volunteers to test vaccines, doused with ringworm, subjected to electric shock, and given lobotomies. They were also fed radioactive isotopes and exposed to chemical warfare agents. This groundbreaking book shows how institutional superintendents, influenced by eugenics, often turned these children over to scientific researchers without a second thought. Based on years of archival work and numerous interviews with both scientific researchers and former test subjects, this is a fascinating and disturbing look at the dark underbelly of American medical history.

[Women in Global Migration, 1945-2000](#) Eleanore O. Hofstetter, 2001-03-30 With large numbers of people migrating to other countries after World War II, a substantial amount of scholarship has focused on the status, problems, and successes of women immigrants since 1945. The first comprehensive compilation of the international literature on these women, this bibliography with over 5,100 entries

reveals the breadth of scholarship on feminist immigration issues Focusing particularly on sources from North America and Western Europe where most immigrant women settled the book includes feminist analyses bibliographies demographic studies economic comparisons educational research health and medical reports legal discussions biographies and autobiographies psychological case studies religious reports sociological investigations and publications dealing with general aspects of female immigration The book covers such legal issues as citizenship international conventions on contract workers the traffic in women and services and government benefits to immigrants Medical entries include such topics as female genital mutilation comparative obstetric results and equity of treatment Education entries cover such subjects as adult education and the second language programs necessary for assimilation With entries in several languages the bibliography includes books journal articles essays and chapters in books dissertations ERIC reports national and international government documents and statistical sources With immigration a major political and social issue in most countries today the book provides an important research tool

The Vaccine Race Meredith Wadman, 2018-09-04 A real jewel of science history brims with suspense and now forgotten catastrophe and intrigue Wadman's smooth prose calmly spins a surpassingly complicated story into a real tour de force The New York Times Riveting The Vaccine Race invites comparison with Rebecca Skloot's 2007 *The Immortal Life of Henrietta Lacks* Nature The epic and controversial story of a major breakthrough in cell biology that led to the conquest of rubella and other devastating diseases Until the late 1960s tens of thousands of American children suffered crippling birth defects if their mothers had been exposed to rubella popularly known as German measles while pregnant there was no vaccine and little understanding of how the disease devastated fetuses In June 1962 a young biologist in Philadelphia using tissue extracted from an aborted fetus from Sweden produced safe clean cells that allowed the creation of vaccines against rubella and other common childhood diseases Two years later in the midst of a devastating German measles epidemic his colleague developed the vaccine that would one day wipe out homegrown rubella The rubella vaccine and others made with those fetal cells have protected more than 150 million people in the United States the vast majority of them preschoolers The new cells and the method of making them also led to vaccines that have protected billions of people around the world from polio rabies chicken pox measles hepatitis A shingles and adenovirus Meredith Wadman's masterful account recovers not only the science of this urgent race but also the political roadblocks that nearly stopped the scientists She describes the terrible dilemmas of pregnant women exposed to German measles and recounts testing on infants prisoners orphans and the intellectually disabled which was common in the era These events take place at the dawn of the battle over using human fetal tissue in research during the arrival of big commerce in campus labs and as huge changes take place in the laws and practices governing who owns research cells and the profits made from biological inventions It is also the story of yet one more unrecognized woman whose cells have been used to save countless lives With another frightening virus measles on the rise today no medical story could have more human drama impact or urgency than

Polio David M. Oshinsky, 2005-04-12 Here David Oshinsky tells the gripping story of the polio terror and of the intense effort to find a cure from the March of Dimes to the discovery of the Salk and Sabin vaccines and beyond Drawing on newly available papers of Jonas Salk Albert Sabin and other key players Oshinsky paints a suspenseful portrait of the race for the cure weaving a dramatic tale centered on the furious rivalry between Salk and Sabin He also tells the story of Isabel Morgan perhaps the most talented of all polio researchers who might have beaten Salk to the prize if she had not retired to raise a family Oshinsky offers an insightful look at the National Foundation for Infantile Paralysis which was founded in the 1930s by FDR and Basil O Connor it revolutionized fundraising and the perception of disease in America Oshinsky also shows how the polio experience revolutionized the way in which the government licensed and tested new drugs before allowing them on the market and the way in which the legal system dealt with manufacturers liability for unsafe products Finally and perhaps most tellingly Oshinsky reveals that polio was never the raging epidemic portrayed by the media but in truth a relatively uncommon disease But in baby booming America increasingly suburban family oriented and hygiene obsessed the specter of polio like the specter of the atomic bomb soon became a cloud of terror over daily life Both a gripping scientific suspense story and a provocative social and cultural history Polio opens a fresh window onto postwar America **Ignored, Shunned, and Invisible** J. David Smith, 2008-12-30 Historically segregation and social isolation have been recurring responses to people considered defective or deficient in some way And it is in the midst of such a society that special educator J David Smith wrote this book which presents critical historical and contemporary issues in mental retardation Told through gripping vignettes and interwoven with the story of the life of John Lovelace a man labeled mentally retarded as a child then institutionalized and sterilized this gripping text will make all readers reconsider not only our social policies and practices but also our personal actions in relation to people with mental retardation Topics covered here include an examination of ways people have been misidentified as having disabilities then needlessly warehoused in institutions Coupled with the tragic story of John Lovelace this book is one that will be long remembered by its readers and will ideally spur them to action This book offers new directions for the field of mental retardation including conceptual and terminology changes regarding intellectual disabilities and new thinking about the people whose lives have been altered by the term and the concept Insights from parents friends teachers and varied special education experts are included as is the strong view of author Smith who befriended Lovelace He was often ignored regularly avoided and treated as less than a person as invisible

explains Smith And Lovelace is the metaphorical island to which each chapter here returns a vivid example of the denial of freedom and dignity to people who bear an intellectually inferior label In the end we see how society can promote values that inspire and challenge us to create humane and just treatment for all or we can just look the other way when facing disturbing human needs *The Emperor of All Maladies* Siddhartha Mukherjee,2011-08-09 This edition includes a new interview with the author P 4 of cover *The Exile Mission* Anna D. Jaroszyńska-Kirchmann,2004 Considering the two distinct Polish immigrant groups after World War II the Polish American descendants of pre war economic migrants and polish refugees fleeing communism this study explores the uneasy challenge to reconcile concepts of responsibility toward their homeland

A Woman Wanders Through Life And Science: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have charmed audiences this year. A Woman Wanders Through Life And Science : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. A Woman Wanders Through Life And Science : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
