A Venture In Immortality:

A Venture in Immortality David Kennedy, 1973 Expanding Humanity's Vision Of God Robert Herrmann, 2009-08-15
How has our understanding of our world and our place in the universe changed in recent decades through the momentous discoveries of science? Do recent developments in the philosophy of science which place limitations on scientific knowing provide a more level playing field? This collection of essays and sermons which have not been readily available before address these thought provoking questions. The John Templeton Foundation sponsored an essay and sermon contest to convey an expanded vision of God, one that is informed by recent discoveries of science on the nature of the universe and the place we have in the world. These selections are the winners of that competition. The book is divided into three sections: Contemporary Science, Raising Theological Questions, New Visions of Theology, and Historical and Philosophical Perspectives on the Science Religion Dialogue. The essays cover such areas as physics, theology, cosmology, origins, and artificial intelligence. There is another way to conceive our life together. There is another way to conceive of our life in God, but it requires a different worldview, not a clockwork universe in which individuals function as discrete springs and gears, but one that looks more like a luminous web in which the whole is far more than the parts. In this universe, there is no such thing as an individual apart from his or her relationships. Every interaction between people and people, between people and things, between things and things changes the face of history. Life on earth cannot be reduced to four sure fire rules. It is an ever unfolding mystery that defies precise prediction. Meanwhile, in this universe, there is no such thing as parts. The whole is the fundamental unit of reality.

Barbara Brown Taylor, *Physics and Faith* A Hospitable Universe Rodolfo Gambini, Jorge Pullin, 2018-04-25. This book argues that new developments in the sciences, in particular twentieth century physics and twenty first century biology, suggest revising several pessimistic outlooks for the development of a scientific understanding of the relationship of humans with the universe, in particular implications for the development of a natural religiousness. In the new vision, a universe which is friendly to life and consciousness naturally emerges.

The William and Mary Literary Magazine, 1922 *The Witness to Immortality in Literature, Philosophy and Life* George Angier Gordon, 1893 The Authority of Religious Experience Charles Lewis Slattery, 1912 *The Methodist Review Quarterly*, 1914 **The Resurrection and Modern Thought** William John Sparrow-Simpson, 1915 *Tell My Mother I'm Not Dead* Trevor Hamilton, 2012-10-08. This book divides into two parts. The first is a personal narrative of the impact of the death of the author's son Ralph on him and his family and his efforts to see if there was any evidence for his continued existence, generated largely through visits to mediums that a thinking person could take seriously. The second is an attempt to evaluate that evidence objectively based on an extensive survey of current and past scientific research in the UK and the USA. The title reflects the inevitable tension between emotion and intellect in such an enquiry.
