A Year In The Life Of Chimpanzee:

The Chimpanzees of the Tai Forest Christophe Boesch, Hedwige Boesch-Achermann, 2000 The chimpanzees are the closest living evolutionary relatives to our own species *Homo sapiens*. As such they have long exerted a fascination over those with an interest in human evolution and what makes humans unique. Christophe Boesch and Hedwige Boesch-Achermann undertook an incredible observational study of a group of wild chimpanzees of the Tai forest in Cote d'Ivoire, spending some fifteen years in the West African jungle with them. This fascinating book is the result of these years of painstaking research among the chimps. Chimpanzee behavior is documented here in all its impressive diversity and variety: Aggression, territoriality, social structure and relationships, reproductive strategies, hunting tool use. Each of these is given its own chapter along with topics such as chimp intelligence, life histories and demography. The authors take care to place their observations within the broader context of research in behavioral ecology and to compare and contrast their findings with other important work on chimpanzee groups such as that by Jane Goodall. The book concludes with a summary chapter relating the chimpanzee findings to our understanding of human evolution. Combining careful scientific observation with a store of entertaining anecdotes, this is a lively and readable book. It also succeeds in shedding light on some of the central questions around the evolutionary relationships between the primates and, in particular, the affinity between chimpanzees and humans. This is a major contribution to the study of the great apes and a significant addition to debates about human ape evolution. It has all the makings of a classic monograph.

Thompson, François Tonneau, 2013-06-29 The relations between behavior evolution and culture have been a subject of vigorous debate since the publication of Darwin's *The Descent of Man* 1871 The latest volume of Perspectives in Ethology brings anthropologists ethologists psychologists and evolutionary theorists together to reexamine this important relation With two exceptions the essays by Brown and Eldredge all of the present essays were originally presented at the Fifth Biannual Symposium on the Science of Behavior held in Guadalajara Mexico in February 1998 The volume opens with the problem of the origins of culture tackled from two different viewpoints by Richerson and Boyd and Lancaster Kaplan Hill and Hurtado respectively Richerson and Boyd analyze the possible relations between climatic change in the Pleistocene and the evolution of social learning evaluating the boundary conditions under which social learning could increase fitness and contribute to culture Lancaster Kaplan Hill and Hurtado examine how a shift in the diet of the genus *Homo* toward difficult to acquire food could have determined or coevolved with unique features of the human life cycle These two essays illustrate how techniques that range from computer modeling to comparative behavioral analysis and that make use of a wide range of data can be used for drawing inferences about past selection pressures As culture evolves it must somehow find its place within and also affect a complex hierarchy of behavioral and biological factors Cognitive Development in Chimpanzees Tetsuro Matsuzawa, Masaki Tomonaga, Masayuki Tanaka, 2006-07-25 From an evolutionary perspective understanding chimpanzees offers a way of understanding the basis of human nature This book on cognitive development in chimpanzees is the first of its kind to focus on infants reared by their own mothers within a natural setting illustrating various aspects of chimpanzee cognition and the developmental changes accompanying them The subjects are chimpanzees of three generations inhabiting an enriched environment as well as a wild community in West Africa There is a foreword by Jane Goodall and 26 color photos of chimpanzees in the laboratory and in the field in West Africa are included *Wonders of Animal Life* Sir John Alexander Hammerton, 2008 **The Chimpanzee Whisperer** Stany Nyandwi, 2022-02-22 From survivor of genocide to conservation hero A moving heartwarming memoir about a real life chimpanzee whisperer now the subject of the award winning documentary film *Pant Hoot* Stany Nyandwi's gift for communicating with chimpanzees is so special that world renowned primatologist Dr Jane Goodall has called him a chimpanzee whisperer His skills and devotion to these creatures our closest living relatives with whom we share 98.7 percent of our DNA have earned him international awards and sent him on travels within Africa and around the world But he began life in poverty born and raised in a dirt floor straw roofed hut in rural Burundi The Chimpanzee Whisperer is the story of his astonishing life journey It is also an African story Receiving only an elementary education before he quit school he suffered injustice and tragic loss because of his ethnic group He began caring for orphaned and rescued chimps in Burundi When the country descended into civil war and genocide

he was forced to flee with the chimps and endured long separation from his family Continuing to work with and learn about chimpanzees in Kenya Uganda and later South Africa he made himself into an incomparable authority His memoir has adventure danger and many unique and touching stories about chimpanzees that show his bond with and understanding of them As told to award winning author David Blissett it reveals a remarkable man who has refused to let circumstances defeat him Conditioned by hate wounded by loss he has lived for love faith and compassion giving new life as Dr Jane Goodall writes in her foreword to so many chimpanzees whose families like his own were torn apart by violence **Chimpanzee** Kevin D. Hunt,2020-08-20 The chimpanzee is one of our planet s best loved and most instantly recognisable animals Splitting from the human lineage between four and six million years ago it is along with its cousin the bonobo our closest living relative sharing around 94% of our DNA First encountered by Westerners in the seventeenth century virtually nothing was known about chimpanzees in their natural environment until 1960 when Jane Goodall travelled to Gombe to live and work with them Accessibly written yet fully referenced and uncompromising in its accuracy and comprehensiveness this book encapsulates everything we currently know about chimpanzees from their discovery and why we study them to their anatomy physiology genetics and culture The text is beautifully illustrated and infused with examples and anecdotes drawn from the author s thirty years of primate observation making this a perfect resource for students of biological anthropology and primatology as well as non specialists interested in chimpanzees **Department of Defense Appropriations for Fiscal Year 1999** United States. Congress. Senate. Committee on Appropriations. Subcommittee on Defense,1998 **Reuben - The Savage Prisoner** Sandra Lynch-Bakken,2015-10-07 For 18 years a lone chimpanzee lives an isolated life bringing on fits of insanity neurosis and self mutilation Then one day the cage door opens and in runs another chimpanzee It s the first ape Reuben has ever seen Intelligent strong gentle and caring Reuben and Jimmy Joe are soon joined by two other chimps Tyler and Ripley Before long the foursome form a remarkable friendship But their joyful bond is short lived when the townspeople of Savage Nebraska mount a brutal tragedy Based on the author s professional experiences Sandra Lynch Bakken chronicles the events leading up to the sad day in September 2005 that forever changed her life and the lives of a captive chimpanzee bachelor group Plying truth with treachery joy with sadness and triumph with defeat Lynch Bakken weaves an emotional non fiction tale that advocates for all animals A story that will touch the hearts of all ages Reuben The Savage Prisoner is sure to have animal lovers and proponents cheering for the good guys the wrongly accused and this amazing species that share over 98 per cent of our genetic makeup **Human Evolutionary Biology** Michael P.
