Auditory Imagery:

Multisensory Imagery Simon Lacey, Rebecca Lawson, 2013-01-19 Is a pear sweeter than a peach Which of Mona Lisa's hands is crossed over the other What would the Moonlight Sonata sound like played by a brass band Although these are questions that appeal to mental imagery in a variety of sensory modalities mental imagery research has been dominated by visual imagery With the emergence of a well established multisensory research community however it is time to look at mental imagery in a wider sensory context Part I of this book provides overviews of unisensory imagery in each sensory modality including motor imagery together with discussions of multisensory and cross modal interactions synesthesia imagery in the blind and following brain damage and methodological considerations Part II reviews the application of mental imagery research in a range of settings including individual differences skilled performance such as sports and surgical training psychopathology and therapy through to stroke rehabilitation This combination of comprehensive coverage of the senses with reviews from both theoretical and applied perspectives not only complements the growing multisensory literature but also responds to recent calls for translational research in the multisensory field **Psychological**

Monographs, 1927 Includes music The ^AOxford Handbook of Sound and Imagination, Volume 1 Mark Grimshaw-Aagaard, Mads Walther-Hansen, Martin Knakkegaard, 2019-07-26 In this two volume Handbook contributors address the tendency to discuss musical imagination through terms like compositional creativity or performance technique correcting the current bias towards visual imagination to instead highlight the many forms of sonic and musical imagination

Auditory Imagery Daniel Reisberg, 1992 The study of mental imagery has been a central concern of modern psychology but most of what we know concerns visual imagery A number of researchers however have recently begun to explore auditory imagery this foundation level volume presents their work The topics covered are diverse a reflection of the fact that auditory imagery seems relevant to numerous research domains from the ordinary memory rehearsal of undergraduates to the delusional voices of schizophrenics from music imagery to imagery for speech The chapters also address the parallels and contrasts between visual and auditory imagery the relations between inner speech and overt speech and between the inner ear and actual hearing This book provides a valuable resource for students in many areas imagery working memory music speech auditory perception schizophrenia or deafness *The Oxford Handbook of Sound and Imagination* Mark

Grimshaw, Mark Grimshaw-Aagaard, Mads Hansen, Martin Knakkegaard, 2019 In this two volume Handbook contributors address the tendency to discuss musical imagination through terms like compositional creativity or performance technique correcting the current bias towards visual imagination to instead highlight the many forms of sonic and musical imagination

Mental Imagery Wilfrid Lay, 1898 Imagery, Creativity, and Discovery B. Roskos-Ewoldsen, M.J. Intons-Peterson, R.E. Anderson, 1993-05-28 What factors affect creativity and the generation of creative images What factors affect the ability to reinterpret those images Research described in this book indicates that expectations constrain both of these attributes of

creativity Characteristics of the imagined pattern such as cohesiveness or its psychological goodness also affect image generation and reinterpretation Other evidence indicates that images can be combined mentally to yield new manipulable composites Cognitive models encompass the research and extend it to fields as diverse as architecture music and problem solving

Olfactory Consciousness across Disciplines Benjamin D. Young, 2015-03-05 Our sense of smell pervasively influences our most common behaviors and daily experience yet little is known about olfactory consciousness Over the past decade and a half research in both the fields of Consciousness Studies and Olfaction has blossomed however olfactory consciousness has received little to no attention The olfactory systems unique anatomy functional organization sensory processes and perceptual experiences offers a fecund area for exploring all aspects of consciousness as well as a external perspective for re examining the assumptions of contemporary theories of consciousness It has even been suggested that the olfactory system may represent the minimal neuroanatomy that is required for conscious processing Given the variegated nature of research on consciousness we include original papers concerning the nature of olfactory consciousness The scope of the special edition widely incorporates olfaction as it relates to Consciousness Awareness Attention Phenomenal or Access Consciousness and Qualia Research concerning olfaction and cross modal integration as it relates to conscious experience is also address As the initial foray into this uncharted area of research we include contributions from across all disciplines contributing to cognitive neuroscience including neurobiology neurology psychology philosophy linguistics and computer sciences It is our hope that this Research Topic will serve as the impetus for future interdisciplinary research on olfaction and consciousness

The Neurosciences and Music III Simone Dalla Bella, Virginia Burdet Penhune, 2009-09 This volume features new research and collaborations in the neuroscience of music and to its visibility within the broader scientific community Contributors include scientists clinicians and students in the fields of neuroscience and music The primary focus is on issues related to music and medicine by focusing on musical disorders and plasticity NOTE Annals volumes are available for sale as individual books or as a journal For information on institutional journal subscriptions please visit [www blackwellpublishing com](http://www.blackwellpublishing.com) nyas ACADEMY MEMBERS Please contact the New York Academy of Sciences directly to place your order [www nyas org](http://www.nyas.org) Members of the New York Academy of Science receive full text access to the Annals online and discounts on print volumes Please visit [http www nyas org](http://www.nyas.org) MemberCenter Join.aspx for more information about becoming a member

The American Journal of Psychology Granville Stanley Hall, Edward Bradford Titchener, Karl M. Dallenbach, Madison Bentley, Edwin Garrigues Boring, Margaret Floy Washburn, 1923
