Atomic And Molecular Data For Space Astronomy:

Atomic and Molecular Data for Space Astronomy Peter L. Smith, Wolfgang L. Wiese, 2013-08-20 This is a very useful reference book for working astronomers and astrophysicists Forming the proceedings of a recent IAU meeting where the availability and the needs of atomic and molecular data were discussed the papers published here discuss existing and planned instruments for astronomical spectroscopy from earth orbiting satellites In particular the atomic and molecular parameters that are or will be needed for analysis of the data obtained by these instruments are considered A number of significant shortcomings in the available databases are identified The needs highlighted will be of interest to laboratory astrophysicists both experimentalists and theorists who can produce the data required A second group of papers provides a current inventory of atomic and molecular data compilations
