Goodall, 2017 This illustrated book covers the complete history of the United States Los Angeles class attack submarines from initial design and construction through testing and trials to its current operations The nuclear powered USS Los Angeles SSN 688 class attack submarine represented the lead ship of the largest group of vessels constructed for the US Navy during the Cold War and was purposefully designed for anti submarine operations against the Soviets Sixty two boats were built and launched between 1976 and 1996 and the class continues to serve in force to this day The exclusive and extensive photographic coverage of the boat s interior is featured here for the first time Details of the boats armament includes four 21 bow mounted torpedo tubes supporting the Mk 48 ADCAP torpedo series Tomahawk BGM 109 cruise missile and Harpoon UGM 84 anti ship missile capability The author s unprecedented access allows the reader a first time view of these submarines

Soviet Cold War Attack Submarines Edward Hampshire, 2020-09-17 In this highly detailed book naval historian Edward Hampshire reveals the fascinating history of the nuclear powered attack submarines built and operated by the Soviet Union in the Cold War including each class of these formidable craft as they developed throughout the Cold War period The November class which were the Soviet Union s first nuclear submarines had originally been designed to fire a single enormous nuclear tipped torpedo but were eventually completed as boats firing standard torpedoes The Alfa class were perhaps the most remarkable submarines of the Cold War titanium hulled which was light and strong but extremely expensive and difficult to weld successfully crewed with only thirty men due to considerable automation and 30% faster than any US submarines they used a radical liquid lead bismuth alloy in the reactor plant The Victor class formed the backbone of the Soviet nuclear submarine fleet in the 1970s and 1980s as hunter killer submarines began to focus on tracking and potentially destroying NATO ballistic missile submarines The Sierra classes were further titanium hulled submarines and the single Mike class submarine was an experimental type containing a number of innovations Finally the Akula class were being constructed as the Cold War ended and these boats form the mainstay of the Russian nuclear attack submarine fleet today This book explores the design development and deployment of each of these classes in detail offering an unparalleled insight into the submarines which served the Soviet Union throughout the Cold War period The text is supported by stunning illustrations photographs and diagrams of the submarines
