Altered Strategic Environment:

The Altered Strategic Environment Peter DeLeon, 1987 START and the Future of Deterrence Michael J. Mazarr, 1990-06-18 Examining the future of nuclear deterrence in the 1990s and beyond this book outlines aspects of the evolving strategic environment It also projects the likely future of deterrence strategies and strategic force postures Other topics such as the Soviet nuclear doctrine are also covered **Defense Issues** , *Defense Viewpoint* , 1991 *Winning the Un-war* Charles V. Peña, 2007 According to President Bush the American people are safer as a result of invading Iraq True Saddam Hussein has been removed from power But al Qaeda the group that planned and carried out the attacks on September 11 remains at large Meanwhile the White House has conceded that Saddam Hussein had nothing to do with the attacks Charles Peña argues that the war in Iraq is but one misstep in the Bush administration's global war on terror Terrorism is simply a tactic however not an enemy Trying to eradicate it is a quixotic quest that does not focus on those responsible for 9/11 Instead the national security strategy should consist of three central elements establishing homeland security against further attacks dismantling the al Qaeda terrorist network and enacting a foreign policy that does not attract new al Qaeda terrorists This approach requires restructuring U S forces and ending Cold War era commitments that distract from the current pressing threat It also requires ameliorating the negative consequences of an interventionist U S foreign policy which creates incentives and opportunities for terrorists to target the United States If we misdiagnose al Qaeda's motivations or focus military efforts on the wrong targets then we run the risk that the war against the al Qaeda terrorist threat and the radical Islamic ideology it represents will become a broader war against the Islamic world that could last generations and cost countless lives With a foreword by Michael Scheuer the bestselling author of *Imperial Hubris* *A Shot in the Dark: A History of the U.S. Army Asymmetric Warfare Group* Paul J. Cook, 2024-05-14 This book presents the U S Army Asymmetric Warfare Group AWG as an example of successful change by the Army in wartime It argues that creating the AWG required senior leaders to create a vision differing from the Army's self conceptualization change bureaucratic processes to turn the vision into an actual unit and then place the new unit in the hands of uniquely qualified leaders to build and sustain it In doing this it considers the forces influencing change within the Army and argues the two most significant are its self conceptualization and institutional bureaucracy The work explores three major subject areas that provide historical context The first is the Army's institutional history from the early 1950s through 2001 This period begins with the Army seeking to validate its place in America's national security strategy and ends with the Army trying to chart a path into the post Cold War future The Army's history is largely one of asymmetric warfare The work thus examines several campaigns that offered lessons for subsequent wars Some lessons the Army took to heart others it ignored As the AWG was a direct outgrowth of the failures and frustrations the Army experienced in Afghanistan and Iraq the book examines these campaigns and identifies the specific problems that led senior Army leaders to create the AWG Finally the work chronicles the AWG's

creation in 2006 growth and re assignment from the Army staff to a fully fledged organization subordinate to the U S Army Training and Doctrine Command in 2011 to its deactivation This action resulted not from the unit s failure to adapt to a post insurgency Army focusing on modernization Rather it resulted from the Army failing to realize that while the AWG was a product of counterinsurgency it provided the capability to support the Army during a period of great strategic and institutional uncertainty

The Nuclear Shadow over South Asia, 1947 to the Present Kaushik Roy,2017-03-02 This collection of seminal articles illustrates the reasons for the spiraling nuclear race in the Asian subcontinent and introduces the principal debates in the field Authors discuss whether the acquisition of nuclear weapons by the South Asian powers has raised the likelihood of a nuclear war in the subcontinent or reduced the chance of a conventional war breaking out They examine whether a small nuclear arsenal or a nuclear triad as declared by India is suitable for bringing stability to the region as well as the risk of an accidental nuclear conflagration The first section charts the evolution of nuclear programmes on the basis of realpolitik and the second section analyses nuclear policies on the basis of religious and cultural ethos A few essays turn the spotlight on the role of external powers in accelerating decelerating and mediating the ongoing nuclear tension between India and Pakistan

Homeward Bound? David G Haglund,2019-09-09 The drastically altered European security context has forced Western defence planners and analysts to reassess core assumptions including the future role of NATO As the organization goes through what may be its most profound restructuring to date one of the critical issues to be resolved is the stationing of Allied troops in Germany the Allianc

Korea in the 21st Century Seung-Ho Joo,Tae-Hwan Kwak,2001 At the turn of the second millennium Koreans face multiple challenges at home and abroad South Korea is still in the throes of democratisation and economic reforms while North Korea faces food shortages and other economic difficulties The two Koreas need to manage the unification process so as to bring about national harmony and promote economic prosperity The Korean people need to devise a new security strategy for a unified Korea to ensure its survival and independence in the early 21st century This collection is divided into three parts and each addresses an important issue area confronting the Korean people in the 21st century Part I examines South Korea s democratisation and economic reforms against the backdrop of the East Asian financial crisis Part II discusses the problems and prospects for inter Korean relations and the characteristics of North Korea s foreign policy behaviour Part III analyses South Korea s security relations with the four major powers at the turn of the new millennium All chapters are written by renowned experts in their fields and offer valuable insights into the dynamics of the two Korean s domestic politics and foreign policy

Risk and Hierarchy in International Society W. Clapton,2014-07-11 The English School of International Relations has traditionally maintained that international society cannot accommodate hierarchical relationships between states This book employs a unique theoretical and conceptual approach challenging this view and arguing that hierarchies are formed on Western states need to manage globalised risks
