Enterprise Helmut K. Anheier, Avner Ben-Ner, 2012-12-06 This volume addresses the need to revisit the economic theories from the last two decades that have contributed to the development of a concentrated research agenda on nonprofit organizations Long neglected as a topic of theorizing and empirical investigation by mainstream economics in particular these initial theories of nonprofit organizations from the late 1970s and early 1980s continue to shape theoretical and conceptual efforts Importantly their influence extends beyond economics and informs sociological and politics science approaches to the set of organizations and institutions located between the market firm and the state agency as well While the theoretical map of nonprofit research has expanded beyond these early attempts and now include several other major theories such as stakeholder approaches supply side or entrepreneurial theories institutional theories and comparative approaches This work suggests that it is time to take stock and reexamine some of the basics from which these economic theories operate

Strategies for Fundraising Success Mary Louise Mussoline, 1998-12-14 As advocates for the poor, builders of community and guardians of the environment, small organizations are big players in the work of the not for profit world. This volume of *New Directions for Philanthropic Fundraising* was written to help people within these small organizations approach fundraising in the same way they approach their programs with pride, determination and passion. The authors consider areas of special importance for small organizations: diversity of income sources, strength of the board of directors, involvement of diverse constituencies in fundraising issues that all small nonprofits face today. They also discuss more focused topics important to small organizations such as the conversion of special events donors to annual fund donors and the important human aspects of working with volunteers. This is the 20th issue of the quarterly journal *New Directions for Philanthropic Fundraising*.

Fundraising, New Challenges and Opportunities Sandra A. Glass, 1999-04-13 There are over forty thousand unique private foundations in the United States with total assets of approximately 300 billion. As these foundations grow in number and size, it is increasingly important for grantseekers to understand their missions and modes of operation. This volume of *New Directions for Philanthropic Fundraising* offers insights into the changes taking place in different types of foundations including special purpose, regional, community and international foundations. The authors suggest practical ways that grantseekers can improve

relations with foundations and show how grantmakers and other foundation staff enhance their effectiveness and better serve their constituents needs through strategic planning and alliance building This is the 23rd issue of the quarterly journal *New Directions for Philanthropic Fundraising* *Managing Think Tanks* Raymond J. Struyk, 2002 *The Impact of Technology on Fundraising* Dwight F. Burlingame, Michael J. Poston, 1999 This issue explores how to harness powerful new information technologies particularly the internet to strengthen fundraising and it examines the ethical issues raised by the extraordinary potential of these technologies The contributors argue that nonprofits may have to develop revolutionary new institutional structures in order to take the fullest advantage of these new tools while at the same time taking care not to abuse the expanded information gathering and outreach capabilities now available to them Chapters use a case study to show how to construct a web page that compellingly reflects an organization's mission and purpose and how to avoid common mistakes when choosing fundraising software The contributors draw on current fundraising regulations to offer a model for regulating internet fundraising practices discuss whether existing guidelines for gathering information on donors and potential donors are still applicable in the new technological environment and challenge nonprofits to use technology to bridge the gap between the haves and have nots This is the 25th issue of the quarterly journal *New Directions for Philanthropic Fundraising*
