Bungalow The Production Of A Global Culture:

The Bungalow Anthony D. King, 1984 I just got off the sunset train I m from the Angel Town The Golden West Los Angeles Where the sun shines all year round I left a girlie back there She s the sweetest girl I know She said Goodbye I ll wait for you In the Land of the Bungalow from In the Land of the Bungalow by George F Devereux 1929 The bungalow in all its various forms has existed since the early seventeenth century from its origin as a Bengalese hut or banggolo made of mud cow dung thatch and bamboo to later developments as a one story square structure surrounded by a collonaded veranda and the subtle permutations exhibited in designs such as the Frank Lloyd Wright style prairie House Originally created as a peasant dwelling in rural India and later an accommodation for European travellers and expansive permanent residences for the colonial ruling class who served there the bungalow has become one of the most frequently adopted house forms throughout the world and the most popular home style in the United States Architects the world over have extolled the bungalow s merits in their interpretations of its modest style and economy while romantic notions of this humble abode have been conveyed through poetry and song by both temporary sojourners and permanent residents rejoicing in its simplistic luxury It is in fact the only dwelling which in both name and form exists on every continent the word bungalow has entered eighteen languages The first work of its kind this richly illustrated volume takes readers on an engaging tour of the history of the bungalow explaining the evolution of this architectural wonder from its inception as a practical dwelling place to its present day incarnation as a suburban home looked upon with affection and pride Here Anthony D King explores the historical forces which in producing the bungalow also shaped the modern world colonialism and industrialization capitalism and socialism urbanization and suburbanization He argues that a global culture of architectural style can be identified with the bungalow one which accords with the development of our international capitalistic and urban culture and that the bungalow was one of if not the first common house types of this culture Every type of bungalow is discussed including the American Craftsman and Arts and Crafts cottage styles the Spanish Colonial and California bungalows that became the basis for suburban sprawl throughout Los Angeles and the Japanese teahouse style that dominates the Florida landscape Offering the definitive history of America s most popular house form this fascinating work provides an engaging look at the charming structure of the bungalow Indeed as this unique book shows one might expect to hear a happy bungalow owner whether from a bohemian summer bungalow in the woods of Vancouver or a family home in the suburbs of Jacksonville Florida singing a bungalow tune Far from the city Somehow it seems We re sitting pretty in Our bungalow Of dreams *Bungalow* Anthony D. King, 1995 [Spaces of Global Cultures](#) Anthony King, 2004-08-02 This book brings together a series of new and historical case studies to show how different phases of globalization are transforming the built environment Taking a broad interdisciplinary approach the author draws on sociological geographical cultural and postcolonial studies to provide a critical account of the development of three key concepts global culture post colonialism and modernity Subsequent case

studies examine how global economic political and cultural forces shape the forms of architectural and urban modernity in globalized suburbs and spaces in major cities worldwide The first book to combine global and postcolonial theoretical approaches to the built environment and to illustrate these with examples Spaces of Global Cultures argues for a more historical and interdisciplinary understanding of globalization one that places material space and the built environment at the centre and calls for new theories to address new conditions

The Magic Mountains Dane Kennedy, 2023-11-10 Perched among peaks that loom over heat shimmering plains hill stations remain among the most curious monuments to the British colonial presence in India In this engaging and meticulously researched study Dane Kennedy explores the development and history of the hill stations of the raj He shows that these cloud enshrouded havens were sites of both refuge and surveillance for British expatriates sanctuaries from the harsh climate as well as an alien culture artificial environments where colonial rulers could nurture educate and reproduce themselves commanding heights from which orders could be issued with an Olympian authority Kennedy charts the symbolic and sociopolitical functions of the hill stations over the course of the nineteenth and early twentieth centuries arguing that these highland communities became much more significant to the British colonial government than mere places for rest and play Particularly after the revolt of 1857 they became headquarters for colonial political and military authorities In addition the hill stations provided employment to countless Indians who worked as porters merchants government clerks domestics and carpenters The isolation of British authorities at the hill stations reflected the paradoxical character of the British raj itself Kennedy argues While attempting to control its subjects it remained aloof from Indian society Ironically as more Indians were drawn to these mountain areas for work and later for vacation the carefully guarded boundaries between the British and their subjects eroded Kennedy argues that after the turn of the century the hill stations were increasingly incorporated into the landscape of Indian social and cultural life This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1996

The Oxford Handbook of Cities in World History Peter Clark, 2013-02-14 In 2008 for the first time the majority of the planet's inhabitants lived in cities and towns Becoming globally urban has been one of mankind's greatest collective achievements over time and raises many questions How did global city systems evolve and interact in the past How have historic urban patterns impacted on those of the contemporary world And what were the key drivers in the roller coaster of urban change over the millennia market forces such as trade and industry rulers and governments competition and collaboration between cities or the urban environment and demographic forces This pioneering comparative work by leading scholars drawn from a range of disciplines offers the first detailed comparative study of urban development from ancient times to the present day The Oxford Handbook of Cities in World History explores not only the main trends in

the growth of cities and towns across the world in Asia and the Middle East Europe Africa and the Americas and the different types of cities from great metropolitan centres to suburbs colonial cities and market towns but also many of the essential themes in the making and remaking of the urban world the role of power economic development migration social inequality environmental challenge and the urban response religion and representation cinema and urban creativity Split into three parts covering Ancient cities the medieval and early modern period and the modern and contemporary era it begins with an introduction by the editor identifying the importance and challenges of research on cities in world history as well as the crucial outlines of urban development since the earliest cities in ancient Mesopotamia to the present **American Imperial Pastoral** Rebecca Tinio McKenna, 2017-01-20 In 1904 renowned architect Daniel Burnham the Progressive Era urban planner who famously Made No Little Plans set off for the Philippines the new US colonial acquisition Charged with designing environments for the occupation government Burnham set out to convey the ambitions and the dominance of the regime drawing on neo classical formalism for the Pacific colony The spaces he created most notably in the summer capital of Baguio gave physical form to American rule and its contradictions In *American Imperial Pastoral* Rebecca Tinio McKenna examines the design construction and use of Baguio making visible the physical shape labor and sustaining practices of the US s new empire especially the dispossessions that underwrote market expansion In the process she demonstrates how colonialists conducted market making through state building and vice versa Where much has been made of the racial dynamics of US colonialism in the region McKenna emphasizes capitalist practices and design ideals giving us a fresh and nuanced understanding of the American occupation of the Philippines *Environmental Perspectives* David Canter, Martin Krampen, David Stea, 2024-11-07 Originally published in 1988 reissued now with a new series introduction *Environmental Perspectives* was the first in a trilogy of books to open the series *Ethnoscapes Current Challenges in the Environmental Social Sciences* These three titles brought together specially commissioned contributions that cover much of the range of topics that the series as a whole would cover Although the following volumes would not have the same format the opening trilogy gave an overview of what was to come while also providing a broad base for the future authors to build upon The first of these volumes focuses essentially on theory It brings together papers covering our growing understanding of the ways in which human actions are integrated within our knowledge of the places in which those actions occur The contributors also explore the social historical antecedents that give meaning to our everyday surroundings as well as the psychological underpinnings to aesthetic experience *A Paradise of Small Houses* Max Podemski, 2024-03-26 From the Haitian style shotgun houses of the 19th century to the lavish high rises of the 21st century a walk through the streets of America s neighborhoods that reveals the rich history and future of urban housing The Philadelphia row house The New York tenement The Boston triple decker Every American city has its own iconic housing style structures that have been home to generations of families and are symbols of identity and pride Max Podemski an urban planner for the city of Los Angeles and lifelong

architecture buff has spent his career in and around these buildings Deftly combining his years of experience with extensive research Podemski walks the reader through the history of our dwelling spaces and offers a blueprint for how time tested urban planning models can help us build the homes the United States so desperately needs In A Paradise of Small Houses Podemski charts how these dwellings have evolved over the centuries according to the geography climate population and culture of each city He introduces the reader to styles like Chicago s prefabricated workers cottages and LA s car friendly dingbats illuminating the human stories behind each city s iconic housing type Through it all Podemski interrogates the American values that have equated home ownership with success and led to the US housing crisis asking How can we look to the past to build the homes neighborhoods and cities of the future that our communities deserve Forms of Dominance Nezar AlSayyad,2024-11-07 Originally published in 1992 as part of the Ethnoscapes Current Challenges in the Environmental Social Sciences series reissued now with a new series introduction and new preface Forms of Dominance On the Architecture and Urbanism of the Colonial Enterprise examines the complex experience of colonial domination social reaction and physical adaptation within the built environment of regions such as Morocco Eastern Europe India Guatemala and East Africa and provides a multi disciplinary and cross cultural perspective on the colonial experience Hybrid Urbanism Nezar AlSayyad,2001-03-30 Despite strong forces toward globalization much of late 20th century urbanism demonstrates a movement toward cultural differentiation Such factors as ethnicity and religious and cultural heritages have led to the concept of hybridity as a shaper of identity Challenging the common assumption that hybrid peoples create hybrid places and hybrid places house hybrid people this book suggests that hybrid environments do not always accommodate pluralistic tendencies or multicultural practices In contrast to the standard position that hybrid space results from the merger of two cultures the book introduces the concept of a third place and argues for a more sophisticated understanding of the principal In contributed chapters the book provides case studies of the third place enabling a comparative and transnational examination of the complexity of hybridity The book is divided into two parts Part one deals with pre 20th century examples of places that capture the intersection of modernity and hybridity Part two considers equivalent sites in the late 20th century demonstrating how hybridity has been a central feature of globalization
