Eco-friendly Products for Sustainable Environment Development Dr. Devidas N. Patil, Dr. Rakesh R. Jadhav, Dr. Apurba Saikia, Mr. Chandan Das, 2022-09-26 Every other day we read news about a fossil recently found that shows us the traces of our ancestors. We, humans and creatures of this world, have always left traces of us behind. But traces of this and previous century are not what we should leave for our future generations. Because this plastic waste, these holes in the ozone layer will endanger the lives of people and there will be extremely bad consequences. Nonrenewable energy sources are causing pollution around the world and are adding to entropy. Plastic will not degrade for coming thousands of years and we are basically synthesizing things that are beyond nature's ability to decompose easily. All this calls for production of material that does the job and is not harmful for our environment. During the old times there were no shopping bags. People used to carry cloth bags. In old days, now paper bags are their environment friendly replacement which is not a very great idea either since we are cutting down trees for that. This book was written keeping in mind all the troubles caused by using products that are harmful for the environment and progress of this world toward creating eco friendly products was discussed. The idea of creating the products that will protect the environment and make it a better place for current and upcoming generations. One of the main problems of using chemical dyes to color the clothes has made its way towards utilizing the dyes that are natural or digital alternatives. Tanneries are popular for releasing chemicals and metals that are toxic for other living things and we do not even realize

how much plastic waste our single shopping trip produces Fuels produced from renewable sources plastic bag alternatives and some environmentally friendly items help people save money Energy saving appliances minimize energy and utility costs while using fewer natural resources Currently most businesses prefer employing eco friendly resources to make items rather than conventional ones in order to protect the environment In addition to the fact that global warming has gotten worse since the turn of the century many businesses have started producing eco friendly goods When choosing to manufacture items some businesspeople find it quite challenging to create a sustainable atmosphere Because the business will be under pressure to develop new technologies to produce a product that is both dependable and environmentally friendly This book will give you a ride of the replacements of products harmful for environment and how their better alternatives are helping the environment get back on track **Environment-Friendly Products—Adapt Green Now** Dr. Aparna P.

Goyal, 2017-12-14 Excessive pollution has provoked the nature and the nature starts behaving in unnatural ways in form of global warming versus global cooling heavy rains versus draught and other natural calamities like frequent earthquakes and tsunami cyclones epidemics and so forth Economic growth via production and consumption threatens peaceful life of human beings on the earth Environment friendly eco green marketing is an attempt to protect consumer welfare and environment the nature through production consumption and disposal of eco friendly products Basically green marketing is concerned with three aspects 1 promotion of production and consummation of pure quality products 2 fair and just dealing with customers and society and 3 protection of ecological environment Thus green marketing is a marketing philosophy that promotes production and selling of pure eco friendly products with protection of ecological balance Green marketing involves multiple activities Green marketing encourages production of pure products by pure technology conservation of energy preservation of environment minimum use of natural resources and more use of natural foods instead of processed foods Efforts of people social organizations firms and governments in this regard can be said as green marketing efforts Green marketing raises the voice against production consumption and or disposal of such products that harm consumers the society and the environment anyway It is necessary that businessmen and users should refrain from harmful products Textiles of Sri Lanka Gayathri Madubhani Ranathunga, 2024-06-22 This book highlights the role of sustainable development in ancient practices to modern innovations in the textiles of Sri Lanka It reveals the textile of Sri Lanka from the historical age to current tech fabrics Supporting the sustainable development goals this book covers the most sought after concepts and practices in textile industry of Sri Lanka such as of maximum utilization zero waste eco friendly production process reuse upcycling recycling and longevity Various topics covered in this book are indigenous cultural textiles women empowerment agro waste utilization secondhand fashion consumption and many more The book is a valuable reference for beginners university students researchers and professionals interested in sustainable development in textiles and allied fields
