A Walk On The Sidewalk:

A Walk on the Sidewalk David William McCormick, 2003 Although training has often been considered a separate business category Richard Cavalier has discovered that training meetings respond as do any other business meetings because they are essentially the same even if curiously structured Therefore training is best seen as an aspect of group communications and subject to the same laws of learning and psychology The U S military developed the first and best complete system for ISD and this book is a precise interpretation in business language of that best system In addition to the step by step presentation of the basic development text as is common to TSD the author has included actual examples of military forms that indicate both a what type of action should be taken in specific instances and b the validity of materials prepared by military personnel who practice the Instructional Systems Development system as described here And most military practitioners of ISD learned ISD in the military by applying its sound principles as you yourself can ISD is remarkably doable Expensive versions of ISD are available through consultants and via disk about 1 000 and up up if you know what you need If not Common Sense ISD will tell you exactly what you need and show you how ISD can help you to achieve the results you seek guaranteed Transportation Research in India Akhilesh Kumar Maurya, Lelitha Devi Vanajakshi, Shriniwas S. and its predecessors have been bipedal walkers for at least six million years by now we take this seemingly arbitrary motion for granted Yet how many of us still really walk in our everyday lives Driven by a combination of a car centric culture and an insatiable thirst for productivity and efficiency we re spending more time sedentary and alone than we ever have before If bipedal walking is truly what makes our species human as paleoanthropologists claim what does it mean that we are designing walking right out of our lives Antonia Malchik asks essential questions at the center of humanity s evolution and social structures Who gets to walk and where How did we lose the right to walk and what implications does that have for the strength of our communities the future of democracy and the pervasive loneliness of individual lives The loss of walking as an individual and a community act has the potential to destroy our deepest spiritual connections our democratic society our neighborhoods and our freedom But we can change the course of our mobility And we need to Delving into a wealth of science history and anecdote from our deepest origins as hominins to our first steps as babies to universal design and social infrastructure A Walking Life shows exactly how walking is essential how deeply reliant our brains and bodies are on this simple pedestrian act and how we can reclaim it
