The Metal Shaper David J. Gingery, 2014-07-11 Build your own Metal Shaper Exotic is a mild adjective when applied to this shaper It will cut splines keyways gears sprockets dovetail slides flat and angular surfaces and irregular profiles And all of these with a simple hand ground lathe tool bit Obsolete in modern industry of course because milling machines do the work much faster and cheaper But you can't beat a shaper for simplicity and economy in the home shop The shaper has a 6 stroke and a mean capacity of 5 x 5 variable and adjustable stroke length automatic variable cross feed and graduated collars You will be proud to add this machine to your shop

The Charcoal Foundry David J. Gingery, 2014-07-09 Charcoal Foundry the first book in the Metal Working Shop From Scrap Series gives you plans for building a metal melting furnace and instructions on basic pattern making and molding All the information needed to set up a foundry in your work shop can be found in this book Simply stated if you can build a sand castle or make a mud pie you can make a sand mold to produce castings for your metal shop projects The main ingredient in these projects is scrap aluminum and pot metal The only tools you need to get started are ordinary home shop hand tools many of which are probably already in your possession Much of the remainder is found as salvage or cast off and little expense need be involved The charcoal foundry is simple to build and operate and the initial cost is so low that it can be in the reach of nearly anyone And the fundamentals of pattern making and molding are easily understood and mastered Once you have built the charcoal foundry and the metal lathe in book 2 there is little beyond your reach by way of shop equipment Build as large or small as you wish and you are your own parts supply company If you already have some machine shop equipment you will find that adding a foundry to your shop greatly expands your capacity Being able to produce your own castings for accessories and equipment is a great advantage Design your own make a copy or follow a plan It's easy when you're in control and can produce your own castings
