Philosophy of Science and the Occult Patrick Grim, 1990-07-17 This book both introduces the philosophy of science through examination of the occult and examines the occult rigorously enough to raise central issues in the philosophy of science Placed in the context of the occult philosophy of science issues become immediately understandable and forcefully compelling Divergent views on astrology parapsychology and quantum mechanics mysticism emphasize topics standard to the philosophy of science Such issues as confirmation and selection for testing causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values are discussed Significantly revised this second edition presents an entirely new section of quantum mechanics and mysticism including instructions from N David Mermin for constructing a device which dramatically illustrates the genuinely puzzling phenomena of quantum mechanics A more complete and current review of research on astrology has been included in this new edition and the section on the problem of demarcation has been broadened

Richard Ned Lebow: Major Texts on Methods and Philosophy of Science Richard Ned Lebow, 2016-09-01 This book about the philosophy of science is the second out of four volumes by Richard Ned Lebow in this book series It not only provides a useful overview of this broad topic but also provides deeper insight into specific topics like the philosophy of science causation epistemology and methods and especially on counterfactual analysis

Professional Learning in a School-Based Community of Science Teachers Wayne Melville, 2010-01-01 The ubiquitous science department occupies an unusual position in most secondary schools Traditionally they have been part of the organisational structure of schools with administrative responsibilities over room allocations teaching assignments and the management of laboratory equipment These are important roles but they only tell half the story Science teachers are more than members of an organisational structure They are also members of a science education community which is shaped by their shared

understanding of science The science department as community also possesses a pivotal if undervalued role in teacher professional learning This book conceptualises professional learning as the engagement of teachers in a virtues based personal reflection and or public discourse around the episteme techne and phronesis in the spaces in between the metaphors of understanding community meanings practice and identity As such it speaks to heads of science departments school administrators and those with an interest in leadership within schools
