Emerging Technologies & Applications in Electrical Engineering Anamika Yadav, K Chandrasekaran, V Hari Priya, D Suresh, 2024-07-08 The First International Conference on Emerging Technologies and Applications in Electrical Engineering ETAEE 2023 was hosted and organized by the Department of Electrical Engineering National Institute of Technology Raipur held on 21st to 22nd December 2023 with CRC Press Taylor and Francis as publication partner ETAEE 2023 aims to emerge as a platform for in depth discussions knowledge sharing and collaborative efforts The main theme of the conference was Sustainable Energy Future With professionals from academia industry and reputable research institutions coming together the conference underlined the importance of staying at the forefront of technical breakthroughs to ensure a sustainable energy future The presentations were delivered by participants on various topics such as Renewable Energy Smart Grid High Voltage Technologies Power Electronics and Drives Electric Transportation Systems Instrumentation Control and IoT Applications in Electrical Engineering Esteemed academicians chaired these sessions fostering in depth discussions and knowledge exchange **Optimizing Edge and Fog Computing Applications with AI and Metaheuristic Algorithms**

Madhusudhan H S, Punit Gupta, Dinesh Kumar Saini, 2025-09-16 Fog and edge computing are two paradigms that have emerged to address the challenges associated with processing and managing data in the era of the Internet of Things IoT Both models involve moving computation and data storage closer to the source of data generation but they have subtle differences in their architectures and scopes These differences are one of the subjects covered in Optimizing Edge and Fog Computing Applications with AI and Metaheuristic Algorithms Other subjects covered in the book include Designing machine learning ML algorithms that are aware of the resource constraints at the edge and fog layers ensures efficient use of computational resources Resource aware models using ML and deep learning models that can adapt their complexity based on available resources and balancing the load allowing for better scalability Implementing secure ML algorithms and models to prevent adversarial attacks and ensure data privacy Securing the communication channels between edge devices fog nodes and the cloud to protect model updates and inferences Kubernetes container orchestration for fog computing Federated learning that enables model training across multiple edge devices without the need to share raw data The book discusses how resource optimization in fog and edge computing is crucial for achieving efficient and effective processing of

data close to the source It explains how both fog and edge computing aim to enhance system performance reduce latency and improve overall resource utilization It examines the combination of intelligent algorithms effective communication protocols and dynamic management strategies required to adapt to changing conditions and workload demands The book explains how security in fog and edge computing requires a combination of technological measures advanced techniques user awareness and organizational policies to effectively protect data and systems from evolving security threats Finally it looks forward with coverage of ongoing research and development which are essential for refining optimization techniques and ensuring the scalability and sustainability of fog and edge computing environments
