Warfare in the Ancient World Stefan G. Chrissanthos, 2008-10-30 From the clash of bronze weapons on bronze armor to the fall of Rome war often decided the course of ancient history This volume is a practical introduction to the study of warfare in the ancient world beginning with Egypt and Mesopotamia and tracing the advances made in battle tactics technology and government over hundreds of years culminating with developments in Greece and the Roman Empire The chronological structure allows the reader to trace certain general themes down through the centuries how various civilizations waged war who served in the various armies and why who the generals and officers were who made the decisions in the field what type of government controlled these armies and from what type of society they sprang Major events and important individuals are discussed in their historical contexts providing a complete understanding of underlying causes and enabling readers to follow the evolution of ancient warfare as armies and empires became steadily larger and more sophisticated Yet as Chrissanthos makes clear history comes full circle during this period Rome's collapse in 476 C E

inaugurated an unforeseen dark age in which great armies were left decimated despite advanced technology that while proving decisive in the outcome of many critical battles and stand offs had vanished amidst the Empire s crumbling walls In addition to the chronological treatment Chrissanthos also includes sections on such important topics as chariot warfare cavalry naval warfare elephants in battle the face of battle and such vital but often overlooked topics as the provisioning of the army with sufficient food and water Eyewitness accounts are incorporated throughout each chapter allowing the reader brief glimpses into the life and times of peasants and soldiers generals and politicians all of whom were dealing with war and its irreconcilable consequences from differing vantage points Battle diagrams and maps are carefully placed throughout the text to help the reader visualize particular aspects of ancient warfare The book also furnishes a detailed timeline and an extensive bibliography containing both modern and ancient sources

Blessed Victors Ruth Sutcliffe,2024-07-25 The late second through third centuries saw the remarkable confluence of the early church s developing identity theological understanding and praxis with a period of

opposition and intermittent persecution from the world around it. Theology necessarily engaged with the persecution experience as the church considered the goodness and providence of God the Name to be confessed and the purposeful outcome of the antagonism they faced. Ruth Sutcliffe argues that the early fathers' theological understanding of the role of persecution in the Christian life informed their exhortations to individual and communal response, contributing to the church's remarkable survival and growth through this period. Four great thinkers of this era—Clement and Origen of Alexandria and Tertullian and Cyprian of Carthage—each have much to contribute to a theological understanding of Christian persecution, and Sutcliffe explores their widely different perspectives, intellectual milieu, and experiences. She explains these differences and similarities in terms of their use of the Scriptures in conversation with their own contexts and agendas, concluding that their differences in approach to persecution can be explained theologically and that these differences offer a unique window into their respective thought. Despite such differences, Sutcliffe stresses that the early church did have a fundamentally coherent theology of persecution which speaks to the worldwide church today.

Reinventing Rural Gregory M.

Fulkerson, Alexander R. Thomas, 2016-10-19 *Reinventing Rural* is a collection of original research papers that examine the ways in which rural people and places are changing in the context of an urbanizing world. This includes exploring the role of the environment, the economy, and related issues such as tourism. While traditionally relying on primary sector work in agriculture, mining, natural resources, and the like, rural areas are finding new ways to sustain themselves. This involves a new emphasis on environmental protection as one important strategy has been to capitalize on natural amenities to attract residents and tourists. Beyond improvements to the economy are general improvements to the quality of life in rural communities. Consistent with this, the volume focuses on the two cornerstones of education and health, considering current challenges and offering ideas for reinventing rural quality of life.

City and Country Alexander R. Thomas, Gregory M.

Fulkerson, 2021-06-17 *City and Country: The Historical Evolution of Urban Rural Systems* begins with a simple assumption: every human requires, on average, two thousand calories per day to stay alive. Tracing the ramifications of this insight leads to the caloric well, the caloric demand at one point in the environment. As population increases, the depth of the caloric well reflects this increased demand and requires a population to go further afield for resources, a condition called urban dependency. *City and Country* traces the structural ramifications of these dynamics as the population increased from the Paleolithic to today. We can understand urban dependency as the product of the caloric demands a population puts on a given environment, and when those demands outstrip the carrying capacity of the environment, a caloric well develops that forces a community to look beyond its immediate area for resources. As the well deepens, the horizon from which resources are gathered is pushed further afield, often resulting in conflict with neighboring groups. Prior to settled villages, increases in population resulted in cultural, technological innovations that allowed for greater use of existing resources. The broad spectrum revolution, circa 20 thousand years ago, the birth of agricultural villages, 11 thousand years ago, and hierarchically

organized systems of multiple settlements working together to produce enough food during the Ubaid period in Mesopotamia seven thousand years ago the first urban rural systems As cities developed increasing population resulted in an ever deepening morass of urban dependency that required expansion of urban rural systems These urban rural dynamics today serve as an underlying logic upon which modern capitalism is built The culmination of two decades of research into the nature of urban rural dynamics City and Country argues that at the heart of the logic of capitalism is an even deeper logic urbanization is based on urban dependency
